## **IBM Midmarket Software Buying and Selling**

**Guide** LindaMay Patterson,IBM Redbooks,2010-07-12 The IBM Midmarket Software Buying and Selling Guide is tailored specifically to help the management and IT staff of small and mid-sized businesses evaluate how the IBM midmarket portfolio can provide simple and cost-effective solutions to common business problems. Along with a midmarket customer focus, this IBM Redpaper™ publication is designed to help IBM teams and Business Partners be more effective in serving small and mid-sized businesses. We illustrate how IBM software for the midmarket can help businesses use the Web to reduce expenses, improve customer service, and expand into new markets. We cover the IBM software offering for the midmarket, which includes what the software does, the platforms it runs on, where to find more information, and how it can help your business become more profitable. IBM Business Partners often keep a printed copy of this guide in their briefcases for software references. Customers can view this guide online and look up software value messages and IBM product family offering comparisons. IBM Sales Representatives can print parts of this guide as leave-behinds for customers to give them extra collateral on midmarket software of interest. To make sure that you have the latest version of this guide, download it from this web address: <http://www.redbooks.ibm.com/abstracts/redp3975.html> Open

## **IBM Business Process Manager V8.5**

**Performance Tuning and Best Practices** Mike Collins,Zi Hui Duan,Andreas Fried,Ben Hoflich,Chris Richardson,Torsten Wilms,IBM Redbooks,2015-02-24 This IBM Redbooks publication provides performance tuning tips and best practices for IBM Business Process Manager IBM BPM V8.5.5 all editions and IBM Business Monitor V8.5.5. These products represent an integrated development and runtime environment based on a key set of service-oriented architecture (SOA) and business process management (BPM) technologies. Such technologies include Service Component Architecture (SCA), Service Data Object (SDO), Business Process Execution Language (BPEL) for web services, and Business Processing Modeling Notation (BPMN). Both IBM Business Process Manager and Business Monitor build on the core capabilities of the IBM WebSphere Application Server infrastructure. As a result, Business Process Manager solutions benefit from tuning, configuration, and best practices information for WebSphere Application Server and the corresponding platform Java virtual machines (JVMs). This book targets a wide variety of groups, both within IBM development services, technical sales, and others, and customers. For customers who are either considering or are in the early stages of implementing a solution incorporating Business Process Manager and Business Monitor, this document proves a useful reference. The book is useful both in terms of best practices during application development and deployment, and as a reference for setup, tuning, and configuration information. This book talks about many issues that can influence the performance of each product and can serve as a guide for making rational first choices in terms of configuration and performance settings. Similarly, customers who already implemented a solution with these products can use the information presented here to gain insight into how their overall integrated solution performance can

Reddy, Sujay Shinde, Rick Smith, IBM Redbooks, 2014-04-02 In today s highly connected world directory servers are the IT cornerstone of many businesses These components of the corporate infrastructure are the foundation of authentication systems for internal and more commonly external user populations Managing a directory server with several hundred internal users is not all that difficult However managing a directory server with several million external users in all 24 time zones throughout the world is a much more daunting task IBM Security Directory Server software can handle millions of entries given the right architecture configuration and performance tuning However that tuning can differ greatly from tuning for a smaller server with only a few hundred thousand entries Managing and tuning a directory server of this size requires a change in mindset Tuning and performance must be a focus even before the hardware is ordered A proactive approach must be taken after installation also including the pretuning steps to better interface with other products to make installations and migrations successful and then regular maintenance to keep the directory running smoothly This IBM Redbooks publication is the accumulation of lessons learned in many different real world environments including a 24 server fault tolerant configuration with more than 300 million entries The authors pooled their knowledge and resources to provide the most comprehensive performance view possible from hardware to software sort heaps to buffer pools and table cardinalities In

large directory server deployments use this document as a guide for how to get the right fit for your environment **DB2 9 for z/OS: Packages Revisited** Paolo Bruni, Sean A. Dunn, Howard Hirsch, Norihiko Nakajima, Suresh Sane, IBM Redbooks, 2022-09-07 DB2 packages were introduced with DB2 V2.3 in 1993. During the 15 years that have elapsed a lot has changed. In particular there is a more widespread use of distributed computing, Java™ language, new tools, and upgrades in the platform software and hardware. The best practices back then just might not be optimal today. In this IBM Redbooks publication we take a fresh look at bringing packages into the 21st century. We begin with an overview of packages and explain the advantages of using packages. Because database request module (DBRM) based plans have been deprecated in DB2 9 you need to convert to packages if you did not use packages already. We provide guidance on using a DB2 provided function to convert from DBRM based plans to packages. We re-examine the application development frameworks for packages, program preparation, package setup, and execution. For distributed applications we include a discussion of a utility to identify and remove deprecated private protocol and converting to DRDA, as well as an introduction to the new pureQuery function of Data Studio. We also discuss common problems and their resolutions. We then explore administration and operational activities dealing with packages, including security, access path management, where we discuss the newly introduced package stability feature to allow for a seamless fallback, and management and performance aspects. The appendixes include useful queries and mention tools for managing packages effectively. **IBM FileNet P8 Platform and Architecture** Wei-Dong Zhu, Nicholas Buchanan, Michael Oland, Thorsten Poggensee, Pablo E. Romero, Chuck Snow, Margaret Worel, IBM Redbooks, 2011-04-21 IBM FileNet Platform is a next generation unified enterprise foundation for the integrated IBM FileNet P8 products. It combines the enterprise content management with comprehensive business process management and compliance capabilities. IBM FileNet P8 addresses the most demanding compliance content and process management needs for your entire organization. It is a key element in creating an agile, adaptable enterprise content management (ECM) environment necessary to support a dynamic organization that must respond quickly to change. In this IBM Redbooks publication we provide an overview of IBM FileNet P8 and describe the core component architecture. We also introduce major expansion products that extend IBM FileNet P8 functionality in the areas of content ingestion, content accessing through connectors and federation, the application framework, and discovery and compliance. In this book we discuss the anatomy of an ECM infrastructure, content event processing, content life cycle, and business processes. This book gives IT architects, IT specialists, and IT Technical Sales a solid understanding of IBM FileNet P8 Platform, its architecture, its functions, and extensibility, and its unlimited capabilities. **F&S Index United States Annual**, 1999 [Using zEnterprise for Smart Analytics: Volume 2 Implementation](#) Mike Ebbers, Alex Louwe Kooijmans, Colin Page, Patrick Hempeler, Qiong Liu, LK Swift, Lih Wang, IBM Redbooks, 2013-04-23 This IBM Redbooks publication series explains the assessment and implementation of a workload integrated within IBM Smarter Banking Showcase and hosted at IBM Montpellier, France.
