A silver paperclip is attached to the left edge of the document. The words "SELF EVIDENT" are printed in a large, bold, black serif font, slanted upwards from left to right. The background is a dark wooden surface.

To Be Self Evident:

To End All Suffering Michael Collender, 2014-03-17 Both Buddhism and the Christian gospel promise the ending of suffering. However, each defines and interprets morality, compassion, proof, and truth according to starkly different worldviews. This is why adjudicating rival claims between these religions has proven so difficult. Two alternate approaches have emerged: treating religious claims as mere personal opinions or postulating some higher standard outside of religion to which each religion must submit. However, both of these approaches to comparative religious research implicitly deny that any religion can present a story about the totality of reality including ultimate standards for proof and truth. This book takes a different approach, entirely demonstrating a way that religions can self-critically engage one another using their own respective standards. Within this framework, early Buddhist philosophy and the Christian faith enter into philosophical dialogue. In the process, *To End All Suffering* pointedly demonstrates that on its own terms, Buddhism cannot account for the very doctrines necessary to show that the Buddha's teachings end suffering. Written primarily for Christians and Buddhists interested in interreligious dialogue, *To End All Suffering* is a course book suitable for individual study or for college or seminary courses in comparative philosophy or religion.

Moral Realism Russ Shafer-Landau, 2003-06-19 Moral Realism is a systematic defence of the idea that there are objective moral standards. In the tradition of Plato and G. E. Moore, Russ Shafer-Landau argues that there are moral principles that are true independently of what anyone anywhere happens to think of them. These principles are a fundamental aspect of reality, just as much as those that govern mathematics or the natural world. They may be true regardless of our ability to grasp them, and their truth is not a matter of their being ratified from any ideal standpoint, nor of being the object of actual or hypothetical consensus, nor of

being an expression of our rational nature Shafer Landau accepts Plato's and Moore's contention that moral truths are sui generis He rejects the currently popular efforts to conceive of ethics as a kind of science and insists that moral truths and properties occupy a distinctive area in our ontology Unlike scientific truths the fundamental moral principles are knowable a priori And unlike mathematical truths they are essentially normative intrinsically action guiding and supplying a justification for all who follow their counsel Moral Realism is the first comprehensive treatise defending non naturalistic moral realism in over a generation It ranges over all of the central issues in contemporary metaethics and will be an important source of discussion for philosophers and their students interested in issues concerning the foundations of ethics
