Understanding Young People In Trouble:

Understanding Children and Young People's Mental Health Anne Claveirole, Martin Gaughan, 2011-06-24 Understanding Children and Young People's Mental Health has been designed to help the student and newly qualified health care professional to familiarise themselves with the key theoretical frameworks underpinning the field of children and young people's mental health. It explores the mental health challenges that children and young people face and how we as adults can work alongside them to help them face and overcome such challenges. This book provides comprehensive information on the theory and practice of particular mental health difficulties which children and young people may have to face including self-harm, depression, suicide, child abuse, eating disorders, substance misuse, and early onset psychosis. Understanding Children and Young People's Mental Health is essential reading for pre-registration students in nursing and healthcare on child and mental health branches and for newly qualified nursing, health and social care practitioners who work with children and young people. Brings together specialist practitioners and academics in the field. Incorporates the latest guidelines and policies. Practical and accessible in style with learning outcomes, activities, examples, and recommended reading in each chapter.

Understanding Children's Social Care Nick Frost, Nigel Parton, 2009-04-22 These two authors are always worth reading for their breadth and originality. Their new book offers a timely and stimulating analysis of modern children's services. David Berridge, Professor of Child and Family Welfare, University of Bristol. Clear yet thorough, practical yet politically insightful, complicated yet coherent, this book will appeal to those who want to get an overview of the territory but also to those who wish to drill down deeper and understand the theoretical underpinning of government policies. Martin C Calder, Honorary Research Fellow, Sheffield Hallam University. This is the first book to provide a comprehensive overview and critical analysis of children's social care in England following the introduction of Every Child Matters and the 2007 Children's Plan. Up to date and accessible, the book examines the key issues surrounding child care policy, politics, and legislation, and the implications they have for practice. The book is organised into three sections: From Children's Departments to Departments of Children's Services, analyses the historical and political changes in the children's service since 1948; Different Service Areas, provides a critical review of the main service areas including safeguarding and child protection; Current Issues and Future Prospects, considers the main challenges and future prospects for children's social care. Essential reading for those studying child social care on programmes in social work, childhood studies, and social policy, the book will also interest postgraduates and practitioners in child care.

Understanding Young People's Science Aspirations Louise Archer, Jennifer DeWitt, 2016-08-12 Understanding Young People's Science Aspirations offers new evidence and understanding about how young people develop their aspirations for education, learning, and ultimately careers in science. Integrating new findings from a major research study with a wide-ranging review of existing international literature, it brings a distinctive sociological analytic lens to the field of science education. The book offers an explanation of how some young people do become dedicated

to follow science and what might be done to increase and broaden this population exploring the need for increased scientific literacy among citizens to enable them to exercise agency and lead a life underpinned by informed decisions about their own health and their environment Key issues considered include why we should study young people s science aspirations the role of families social class and science capital in career choice the links between ethnicity gender and science aspirations the implications for research policy and practice Set in the context of widespread international policy concern about the urgent need to improve increase and diversify participation in post 16 science this key text considers how we must encourage a supply of appropriately qualified future scientists and workers in STEM industries and ensure a high level of scientific literacy in society It is a crucial read for all training and practicing science teachers education researchers and academics as well as anyone invested in the desire to help fulfil young people s science aspirations *Understanding Children and Childhood* Anne B.
