Unfolding Meaning

Giovanni Stanghellini, Milena Mancini

Unfolding Meaning:

Unfolding Meaning David Bohm, 2006-11-22 First published in 1987 In *Unfolding Meaning* the author one of the most provocative and original thinkers of our time argues that there are other ways of thinking to bring about a different more harmonious reality Our fragmented mechanistic notion of order derives from the modern conception that our earth is only part not as it was with the Greeks the centre of the immense universe of material bodies The implications of this idea permeate modern science and technology today and also our general attitude to life

Meaning Takes Time to Unfold: Towards a Heideggerian Ontology of Temporal Differentiation Renxiang Liu, 2025-03-29 This book proposes a reconsideration of the intertwinement of time meaning and the piecemeal unfolding of things It gives a phenomenological ontological account of the time horizon at work in each being's manifestation explores the notion of time as a productive resistance in this manifestation and redefines human finitude and subjectivity accordingly to enable an attentive mode of waiting for meaning The discussion is significantly informed by but not limited to the works of Martin Heidegger and thus responds to the question of the turn in Heidegger's career by suggesting a systematic framework centered upon a generalized finitude of Being as such which may have consistently underlain Heidegger's thinking before and after the turn As subjectivity receives a qualified affirmation in the book in contrast to both subjectivist voluntarism and impersonalism this text also opens up the possibility to think of the plurality of human beings as essential to being human While the book is a continuation of a few traditions in continental philosophy which takes time philosophically seriously it is distinctive in not considering time abstractly but always situating its conceptualization in the context of what it means for a thing or an event to be Instead of a mere measure of change an itself invariant structure of happening or a new metaphysical absolute time is interpreted here as the way beings are The interpretation comes from and seeks to do justice to the basic experience of time bringing about wonder fulfillment or disappointment The book appeals to students and researchers working on Heidegger scholarship phenomenology and more generally the philosophy of time and subjectivity It inspires a patience for meaning in mortal transience to find dignity and beauty in what will eventually expire that is in life as such

Fundamentals of Well-Being Patricia Gailey Ph.D., 2022-11-16 *Fundamentals of Well Being Four Qualities You Can't Live Without* integrates deep ecology science quantum science and occupational science to shine a definitive light on what is healthy and what is not *Fundamentals* takes readers beyond the usual prescriptive calls for exercise rest and diet to look at the core qualities required for us to stay alive Science and spirituality are integrated to support successful navigation of the chaos and order cycles of human experience Problematic themes are examined for their usefulness and easy to understand diagrams make complex scientific concepts accessible *Fundamentals* illuminates the subtle implications of our thoughts and behaviors to show what must be our personal priorities if we are to survive and thrive

Dual-Aspect Monism and the Deep Structure of Meaning Harald Atmanspacher, Dean Rickles, 2022-03-29 *Dual Aspect Monism and the Deep Structure of*

Meaning investigates the metaphysical position of dual aspect monism with particular emphasis on the concept of meaning as a fundamental feature of the fabric of reality. As an alternative to other positions mainly dualism, physicalism, idealism that have been proposed to understand consciousness and its place in nature, the decompositional version of dual aspect monism considers the mental and the physical as two aspects of one underlying undivided reality that is psychophysically neutral. Inspired by analogies with modern physics and driven by its conceptual problems, Wolfgang Pauli, Carl Gustav Jung, Arthur Eddington, John Wheeler, David Bohm, and Basil Hiley are the originators of the approaches studied. A radically novel common theme in their approaches is the constitutive role of meaning and its deep structure relating the mental and the physical to a psychophysically neutral base. The authors reconstruct the formal structure of these approaches and compare their conceptual emphases as well as their relative strengths and weaknesses. They also address a number of challenging themes for current and future interdisciplinary research, both theoretical and empirical, that arise from the presented frameworks of thinking. Dual Aspect Monism and the Deep Structure of Meaning will be of interest to researchers and advanced students working in consciousness studies, philosophy of mind, philosophy of science, philosophy of physics, metaphysics, and the history of 20th century philosophy and physics.

Transformative Sustainability Education Elizabeth A. Lange, 2023-03-28. This book lays out the principles and practices of transformative sustainability education using a relational way of thinking and being. Elizabeth A. Lange advocates for a new approach to environmental and sustainability education that of rethinking the Western way of knowing and being and engendering a frank discussion about the societal elements that are generating climate, environmental, economic, and social issues. Highlighting the importance of Indigenous and life-giving cultures, the book covers educational theory, transformation stories of adult learners, social and economic critique, and visions of changemakers. Each chapter also has a strong pedagogical element with entry points for learners and embodied practices and examples of taking action at micro, meso, macro levels woven throughout. Overall, this book enacts a relational approach to transformative sustainability education that draws from post-humanist theory, process thought, relational ontology, decolonization theory, Indigenous philosophy, and a spirituality that builds a sense of sacred towards the living world. Written in an imaginative storytelling manner, this book will be a great resource for formal and nonformal environmental and sustainability educators.
