What Works:

The What Works Centres Michael Sanders, Jonathan Breckon, 2023-04-28 The last decade has seen a growing focus on producing evidence based policy and practice in governments around the world with a specific focus on causal evidence of the impacts of a particular policy on outcomes for citizens The UK is a key example of this with the establishment of 14 What Works Centres which collate create and translate evidence in different policy and practice domains In this book leaders researchers and practitioners from these institutions share insights to help understand what has worked so far in the Centres and what could be done better in future It offers guidance to policy makers and funders looking to establish new centres and for academics looking to create similar institutions that can have a practical impact on the improvement of the world around us

Rethinking What Works with Offenders Stephen Farrall, 2022-04-27 When it was published twenty years ago *Rethinking What Works with Offenders* made a major contribution to criminological knowledge on why people stopped

offending and the impact the probation service had on the desistance process Unlike other studies that had relied on official conviction data it was the first to make use of self reported data including interviews with men and women on probation and their supervising Probation Officers It reconceptualised probation outcomes in terms of degrees of success rather than as successful or unsuccessful and offered important policy implications of these conclusions The Twentieth Anniversary edition contains the original text along with a new Foreword by Shadd Maruna and Fergus McNeill locating the book historically and assessing its continued importance to Criminology It also includes a new chapter by the author reporting on the key findings of the follow up interviews in 2004 and 2010 12 reflecting on key developments in the field and developing a theory of assisted desistance Furthermore it features four new commentaries from Mark Halsey Isabelle F Dufour Martine Herzog Evans and Jos Cid reflecting on the importance and legacy of the book This book presents an important and challenging range of findings on what works in probation and with offenders and remains essential reading for anybody professionally concerned with the present and future of probation

Examining The Impact of School Inspection On Teaching and Learning. Dubai Private Schools as a Case Study Mohamad Alkutich,2017-05-15 Master s Thesis from the year 2016 in the subject Pedagogy The Teacher Educational Leadership language English abstract School inspection is one of the most challenging aspects in education it represents an approach of accountability in teaching and learning Moreover school inspection provides policy and decision makers with accurate information about the current state of education in their respective institutions The main purpose of this study is to examine and determine the impact of school inspection on teaching and learning in Dubai based private schools and to give some recommendations into how to conduct effective school inspection that would positively influence teaching and learning This research included 37 participants 2 inspectors 4 head teachers and 31 teachers from 4 private schools who follow different types of curricula from all grades of performance according to inspection reports conducted in the 2014 2015 academic year The findings show that school inspection has a significant role in school improvement especially in teaching and learning Teachers acknowledge the feedback that inspectors give to them However school inspection also has a negative impact on teaching and learning for instance it forces some schools to show activities they have never done before Moreover the school inspection reports and recommendations in some cases are superficial and are not related to the school context moreover they often do not show teachers how they can respond to criticism in the reality of

their teaching practice Nevertheless the relationship between inspectors and teachers is not that positive especially in some subjects such as Arabic language and Islamic Studies This piece of research suggests some areas for the betterment in school inspection such as giving more importance for SSE School Self evaluations shortening the notice period visiting schools at different times throughout the academic year making such visits every three years as well as ensuring that school inspectors have a high degree in education and in the subject they inspect Nevertheless it recommends establishing an independent school inspection system On the other hand this study suggests further research on the accountability of teaching and learning in Dubai in specific subjects such as Arabic and Islamic studies because reality shows that the recent intervention and policy have not been as fruitful as expected
