## **Texture Analysis In Materials Science Mathematical Methods:**

Texture Analysis in Materials Science H.-J. Bunge, 2013-09-03 *Texture Analysis in Materials Science Mathematical Methods* focuses on the methodologies processes techniques and mathematical aids in the orientation distribution of crystallites The manuscript first offers information on the orientation of individual crystallites and orientation distributions Topics include properties and representations of rotations orientation distance and ambiguity of rotation as a consequence of crystal and specimen symmetry The book also takes a look at expansion of orientation distribution functions in series of generalized spherical harmonics fiber textures and methods not based on the series expansion The publication reviews special distribution functions texture transformation and system of programs for the texture analysis of sheets of cubic materials The text also ponders on the estimation of errors texture analysis and physical properties of polycrystalline materials Topics include comparison of experimental and recalculated pole figures indetermination error for incomplete pole figures and determination of the texture coefficients from anisotropic polycrystal properties The manuscript is a dependable reference for readers interested in the use of mathematical aids in the orientation distribution of crystallites
