# The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees you'll be supporting, and what will be best for them too.

The way to build a hybrid work model is to first ask what things will be successful, and address the most common challenges along the way.

Have you thought about how you could deliver a personalized employee experience? How will you support the employees' own needs as you build the workplace of the future?

As decisions can be made by different teams, the more prepared you are, the more likely you'll be to succeed.
