examined as is the way of life they engendered including some of the side effects of alleyway house life such as the literature it inspired both foreign and local as well as the portrayal of life in the laneways as seen in films set in the city The book ends by posing the question what next for the alleyway house Does it even have a future and if so what lies ahead for this rapidly vanishing typology This interdisciplinary book will be welcomed by students and scholars of Chinese studies architecture and urban development as well as history and literature *Traditional Dwellings and Settlements Review*, 2005 East Asian Architecture in Globalization Subin Xu, Nobuo Aoki, B bio Vieira Amaro, 2021-06-18 This book collects a selected list of peer reviewed papers presented at EAAC 2017 International Conference on East Asian Architectural Culture the leading conference on architectural history and built heritage conservation in the East Asia region While centered around the core issue of globalization and its complex effects on East Asian architectural cultures the selected papers were arranged into four major sub topics Historical Conservation Methodology Adaptive Reuse and Community Design All together this collection showcases the most recent disciplinary developments in East Asian countries as well as the main concerns and prospects of leading practitioners The wide range of contributions and perspectives included here in English language for a global audience should be of considerable appeal to all scholars and professionals in the fields of architectural and urban design history of the built environment and heritage conservation policies and methods **Vernacular Architecture** Qijun Wang, 2015 Vernacular Dwellings traces the evolution of Chinese dwellings from early nomadic cave dwellings to the classic courtyard house He also discusses the techniques and materials used to construct traditional dwellings from early mixed clay and wood construction to the brick and concrete used in the modern era The layouts of towns and villages are also explored in terms of feng shui including the position of towns the configuration of streets and the placement of squares Vernacular Dwellings includes 121 color photographs 86 illustrations and figures and 2 maps illustrating province by province the vernacular dwelling characteristics of different areas of China and showing the beauty created by Chinese artists and architects **Design, User Experience, and Usability: Design for Emotion, Well-being and Health, Learning, and Culture** Marcelo M.
