Wasteworld 2 Resurrection:

Extrapolation, 1987 **Nuclear Holocausts** Paul Brians, 1987 The anxiety caused by the thought of nuclear war causes some people to avoid the topic altogether some to despair and others to place unwarranted confidence in scientific or governmental control However the vivid characters and realistic settings of fiction can bring home the impact of a nuclear war in a way that makes the topic difficult to avoid and allows readers to confront their fears and phobias This bibliography study is the only compilation of its kind to deal exclusively with nuclear war in fiction The first five chapters provide a historical survey of the development of the nuclear war theme and a study of the causes and aftermath of nuclear war as treated in literature In addition Brians considers the significant failure of some works to confront the subject and the success of others as educational tools With a clear focus on the subject of war this work does not deal with such related topics as nuclear accidents reactor disasters or near war situations The bulk of the book is given over to the detailed annotated bibliography which consists of over 800 entries with associated checklists Intended to provide scholars librarians and general readers with ready access to a great variety of information about his body of writing the bibliography lists both hardcover and paper editions of books and the reprinting of each short story and corrects several errors in other standard reference works In his critical analysis and through the annotations in the bibliography Brians attempts to improve our understanding of cultural attitudes toward the dangers posed by the ever present reality of nuclear weaponry Jacket **Canada's Waste Flows** Myra J. Hird, 2021-02-15 From shipments of Canadian waste rotting in developing countries to overflowing landfills and ineffective recycling programs Canada is facing a waste crisis Canadians are becoming increasingly aware that waste is an acute environmental and human health issue and a complex one the solutions to which are often contradictory Canada's Waste Flows is an honest look at the production and movement of Canadian waste from region to region and across the globe and its consequences Through a series of timely empirical case studies the book reveals waste as less of a technological problem and more of a material economic political historical and cultural concern Canada's Waste Flows demonstrates that Canadians are misdirecting their attention to post consumer waste and their responsibility for minimizing it through recycling waste must be understood as a social justice issue and in particular as a symptom of ongoing settler colonialism Through a comparative study of waste management in southern and northern Canadian communities Myra Hird argues that we will only resolve our waste crisis through democratic engagement A critical and compelling book that will generate conversation and incite change Canada's Waste Flows uncovers how Canada's role as a global leader in waste production and export is key to changing Canada's waste future Science Fiction and Fantasy Series and Sequels: Books Tim Cottrill, Martin Harry Greenberg, Charles Gordon Waugh, 1986 *Science Fiction and Fantasy Literature, 1975-1991* R.
