What is Economic Development? Amit S. Ray,Manmohan Agarwal,M. Parameswaran,2019-01-14 Development performance is not merely economic growth and prosperity but includes a multitude of goals This monograph makes an attempt to conceptualize development consisting of eight dimensions material prosperity education health economic security personal security environmental conditions political voice and social connections The authors implement this multidimensional concept to design not only an overall index of development DI for Indian states but also three sub indices human development HD security SEC and voice and confidence VC that broadly represent three distinct aspects of development The results clearly show that state level performances vary considerably across the various dimensions of development No state does uniformly well or badly across all levels thereby exposing the fallacy of branding the development experience of a particular state as ideal based on its achievement on some aspects of development Since good performance in one dimension does not ensure doing well on other dimensions too it would be inappropriate to ignore the performances on the three sub indices and the eight dimensions Recognition of such diversity of performance is particularly important in a federal structure like India where different states may have different development priorities This study will enable states to reflect on whether they have been performing according to their priorities and if not they may choose to tweak their policies or their development strategies Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka
