Rigo Tietz, 2013-04-10 Research based spin off companies are a special subgroup of new technology based ventures and play an important role for innovation and economic development Executive teams of academic spin offs face several challenges in building up sustainable and profitable ventures because they often lack managerial and entrepreneurial skills Based on a quantitative analysis of 193 German spin offs Rigo Tietz examines the relationships between executive team characteristics strategic decision making and firm performance The study contributes to the entrepreneurship and strategic management literature and has practical implications for entrepreneurs and managers policymakers and practitioners of start up initiatives and technology transfer organisations [Trends In Innovation And Entrepreneurship Research: Ecosystems, Digital Technologies And Responses To Shocks](#) Alexander Brem, Jin Chen, 2023-06-28

The chapters in the book focus on recent developments in the field of technological innovation and entrepreneurship It is structured in three parts The focus is on innovation and entrepreneurial ecosystems digital technologies and innovation as well as responses to pandemics resulting from external shocks Carefully selected on the basis of relevance and rigor the chapters in the book take the readers through various trending research topics **SBIR at NASA** National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program--Phase II, 2016-05-02 The Small Business Innovation Research SBIR program is one of the largest examples of U S public private partnerships and was established in 1982 to encourage small businesses to develop new processes and products and to provide quality research in support of the U S government s many missions The U S Congress tasked the National Research Council with undertaking a comprehensive study of how the SBIR program has stimulated technological innovation and used small businesses to meet federal research and development needs and with recommending further improvements to the program In the first round of this study an ad hoc committee prepared a series of reports from 2004 to 2009 on the SBIR program at the five agencies responsible for 96 percent of the program s operations including NASA In a follow up to the first round NASA requested from the Academies an assessment focused on operational questions in order to identify further improvements to the program Public private partnerships like SBIR are particularly important since today s knowledge economy is driven in large part by the nation s capacity to innovate One of the defining features of the U S economy is a high

level of entrepreneurial activity Entrepreneurs in the United States see opportunities and are willing and able to assume risk to bring new welfare enhancing wealth generating technologies to the market Yet although discoveries in various fields present new opportunities converting these discoveries into innovations for the market involves substantial challenges The American capacity for innovation can be strengthened by addressing the challenges faced by entrepreneurs *Historical Studies in the Societal Impact of Spaceflight* Steven J.
