## **Spirits In Motion:**

Minds in Motion Anne M. Thell, 2017-08-31 The central claim of *Minds in Motion* is that British travel writing of the long eighteenth century functions as an epistemological playing field where authors test empiricist models of engagement with the world while simultaneously seeking out the role of the self and the imagination in producing knowledge Whether exploring the relationship between the senses and the mind the narrative viability of experimental detachment or the literary dynamics of virtual witnessing eighteenth century travel authors persistently confront their positionality and raise difficult questions about the nature and value of first hand experience In one way or another they also complicate empiricist ideals by exploring the limits of individual perception and the role of the imagination in generating and relating knowledge While the genre is often viewed as either numbingly documentary or non literary and commercial travel literature actually operates at the front line of the period s intellectual developments illustrating both how individual writers grapple with philosophical ideals and how these ideals filter into the lives of ordinary people Indeed travel literature directly engages the scientific and philosophical concerns of the period while it is also widely avidly read as such it offers models for cognitive and rhetorical practices that are evaluated and either embraced or rejected by readers in a process of identification not unlike that which occurs in early English fiction Moreover because eighteenth century travel literature is so crucial to the development of so many fields from botany to the novel it illustrates vividly the divisive energies of discipline and genre formation while also archiving the shared aims and methods of what will become discrete fields of study Travelogues as diverse as Margaret Cavendish s *Blazing World* 1666 and Samuel Johnson s *Journey to the Western Islands of Scotland* 1775 reveal the epistemological circuitry of the eighteenth century and historicize the absorption of the philosophical tendencies that have come to define modernity

*Ghosts and Spirits in the Ancient World* Eric John Dingwall, 1930

**A Goddess in Motion** Roger Canals, 2017-08-01 The current practice of the cult of Mar a Lionza is one of the most important and yet unexplored religious practices in Venezuela Based on long term fieldwork this book explores the role of images and visual culture within the cult By adopting a relational approach *A Goddess in Motion* shows how the innumerable images of this goddess represented as an Indian white or mestizo woman move constantly from objects to bodies from bodies to dreams and from the religion domain to the art world In short this book is a fascinating study that sheds light on the role of visual creativity in contemporary religious manifestations

Early Modern Spaces in Motion Kimberley Skelton, 2025-10-01 Stretching back to antiquity motion had been a key means of designing and describing the physical environment But during the sixteenth through eighteenth centuries individuals across Europe increasingly designed experienced and described a new world of motion one characterized by continuous rather than segmented movement New spaces that included vistas along house interiors and uninterrupted library reading rooms offered open expanses for shaping sequences of social behaviour scientists observed how the Earth rotated around the sun and philosophers attributed emotions to neural vibrations in the human brain

Early Modern Spaces in Motion examines this increased emphasis on motion with eight essays encompassing a geographical span of Portugal to German speaking lands and a disciplinary range from architectural history to English It consequently merges longstanding strands of analysis considering people in motion and buildings in motion to explore the cultural historical attitudes underpinning the varied impacts of motion in early modern Europe

Connectivity in Motion Burkhard Schnepel, Edward A. Alpers,2017-10-30

This original collection brings islands to the fore in a growing body of scholarship on the Indian Ocean examining them as hubs or points of convergence and divergence in a world of maritime movements and exchanges Straddling history and anthropology and grounded in the framework of connectivity the book tackles central themes such as smallness translocality and the island factor It moves to the farthest reaches of the region with a rich variety of case studies on the Swahili Comorian world the Maldives Indonesia and more With remarkable breadth and cohesion these essays capture the circulations of people goods rituals sociocultural practices and ideas that constitute the Indian Ocean world Together they take up islandness as an explicit empirical and methodological issue as few have done before
