Buildings* Marco Casini,2016-05-27 *Smart Buildings Advanced Materials and Nanotechnology to Improve Energy Efficiency
and Environmental Performance* presents a thorough analysis of the latest advancements in construction materials and
building design that are applied to maximize building efficiency in both new and existing buildings After a brief introduction
on the issues concerning the design process in the third millennium Part One examines the differences between Zero Energy
Green and Smart Buildings with particular emphasis placed on the issue of smart buildings and smart housing mainly the
envelope and how to make it more adaptive with the new possibilities offered by nanotechnology and smart materials Part
Two focuses on the last generation of solutions for smart thermal insulation Based on the results of extensive research into
more innovative insulation materials chapters discuss achievements in nanotechnology bio ecological and phase change
materials The technical characteristics performance level and methods of use for each are described in detail as are the
achievements in the field of green walls and their use as a solution for upgrading the energy efficiency and environmental
performance of existing buildings Finally Part Three reviews current research on smart windows with the assumption that
transparent surfaces represent the most critical element in the energy balance of the building Chapters provide an extensive
review on the technical features of transparent closures that are currently on the market or under development from so
called dynamic glazing to bio adaptive and photovoltaic glazing The aesthetic potential and performance limits are also be
discussed Presents valuable definitions that are given to explain the characteristics requirements and differences between

zero energy green and smart buildings Contains particular focus on the next generation of construction materials and the most advanced products currently entering the market Lists both the advantages and disadvantages to help the reader choose the most suitable solution Takes into consideration both design and materials aspects Promotes the existence of new advanced materials providing technical information to encourage further use and reduce costs compared to more traditional materials
