Stochastic Models For Social Processes:

Stochastic Models for Social Processes David J. Bartholomew, 1967 **Stochastic Modelling of Social Processes** Andreas Diekmann, Peter Mitter, 2014-05-10 Stochastic Modelling of Social Processes provides information pertinent to the development in the field of stochastic modeling and its applications in the social sciences This book demonstrates that stochastic models can fulfill the goals of explanation and prediction Organized into nine chapters this book begins with an overview of stochastic models that fulfill normative predictive and structural analytic roles with the aid of the theory of probability This text then examines the study of labor market structures using analysis of job and career mobility which is one of the approaches taken by sociologists in research on the labor market Other chapters consider the characteristic trends and patterns from data on divorces This book discusses as well the two approaches of stochastic modeling of social processes namely competing risk models and semi Markov processes The final chapter deals with the practical application of regression models of survival data This book is a valuable resource for social scientists and statisticians Stochastic Models for Social Processes Davis J. Bartholomew, 1970 Stochastic Models for Social Processes David John Bartholomew, 1982 Stochastic Models for Social Processes Davis J. Bartholomew, 1970 **Stochastic Models for Social Processes** David J. Bartholomew, 1967 **Stochastic Processes in Sociology** British Sociological Association, 1973

Modeling Social Processes of Aggregation Lawrence Hazelrigg, 2025-03-21 This book demonstrates via formal statements and empirical illustrations that nonlinearities in social processes can be modeled systematically to create solutions with practical applications in the institutional forms of paid employment schooling and familial relations including marital and kinship ties and the rearing of children It shows how social processes can be modeled accurately through analyzing time series data specifically a temporal sequence of process outcomes that is dense enough in observation time to support appropriate techniques of modeling the outcome sequence The book illustrates techniques using minimal mathematical formalism which is explained also in careful narrative descriptions of the model logic **Stochastic Models for Social Process** David J. Bartholomew, 1967 Social Dynamics Models and Methods Nancy Brandon Tuma, 1984-08-28 *Social Dynamics Models and Methods* focuses on sociological methodology and on the practice of sociological research This book is organized into three parts encompassing 16 chapters that deal with the basic principles of social dynamics The first part of this book considers the development of models and methods for causal analysis of the actual time paths of change in attributes of individual and social systems This part also discusses the applications in which the use of dynamic models and methods seems to have enhanced the capacity to formulate and test sociological arguments These models and methods are useful for answering questions about the detailed structure of social change processes The second part explores the formulation of the continuous time models of change in both quantitative and qualitative outcomes and the development of suitable methods for estimating these models from the kinds of data commonly available to sociologists The third part

describes a stochastic framework for analyzing both qualitative and quantitative outcome of social changes This part also discusses the sociologists perspective on the empirical study of social change processes This text will be of great value to sociologists and sociological researchers *Proceedings of the 2018 Conference of the Computational Social Science Society of the Americas* Ted Carmichael,Zining Yang,2020-05-27 This book contains a selection of the latest research in the field of Computational Social Science CSS methods uses and results as presented at the 2018 annual conference of the CSSSA This conference was held in Santa Fe New Mexico October 25 28 2018 at the Drury Plaza Hotel CSS investigates social and behavioral dynamics in both nature and society through computer simulation network analysis and the science of complex systems The Computational Social Science Society of the Americas CSSSA is a professional society that aims to advance the field of CSS in all its areas from fundamental principles to real world applications by holding conferences and workshops promoting standards of scientific excellence in research and teaching and publishing novel research findings What follows is a diverse representation of new approaches and research findings using the tools of CSS and Agent Based Modeling ABM in exploring complex phenomena across many different domains Readers will not only have the methods and results of these specific projects on which to build but will also gain a greater appreciation for the broad scope of CSS and have a wealth of case study examples that can serve as meaningful exemplars for new research projects and activities This book we hope will appeal to any researchers and students working in the social sciences broadly defined who aim to better understand and apply the concepts of Complex Adaptive Systems to their work

Computer Modelling of Social Processes Wim B G Liebrand,Andrzej Nowak,Rainer Hegselmann,1998-07-29 This book introduces and the new computer based research methods for studying and modeling complex social phenomena It is the first coherent collection that surveys the impact that computer based methods have had on the social and behavioural sciences and illustrates the potential for future research The methods are presented in an accessible manner and do not assume any background in computer science The authors introduce each chapter and explain how computers can help to study social processes and each method is described in relation to a substantive issue to show how it can contribute to our understanding of complex problems The themes covered include computer simulation neural and social networks and the visualizat Identifying Structural Parameters of Social Processes Using Fragmentary Data Burton Singer,Seymour Spilerman,1975 *The SAGE Handbook of Social Network Analysis* John Scott,Peter J.
