**Dimensions of Competitiveness** Paul De Grauwe, 2010-07-23 Leading economists analyze the multiple factors that drive competitiveness among nations in world markets. Competitiveness among nations is often approached as if it were a sports competition: some countries win medals, others lose out. This view of countries fighting it out in the economic arena is especially popular in business circles and among politicians. Economists, however, take a very different approach to international economic relations, arguing that international trade leads not to winners and losers but to win-win situations in which all countries profit. In this volume, leading economists take on the sometimes derided concept of competitiveness, demonstrating the value of systematic analysis in an area too often dominated by special interest groups who use and abuse the concept to advance hidden agendas. The chapters range from broad theoretical views to case studies examining the multiple factors that drive competitiveness. Contributors consider the conceptual framework underlying the World Economic Forum's approach to competitiveness; differences in per capita GDP between the United States and the European Union; an integrated approach to measuring competitiveness and comparative advantage; divergent trends in price and cost competitiveness in the euro area; methodological issues in constructing competitiveness indicators; taxation and international competitiveness; and a case study of Mexico's competitiveness in world markets in comparison to China's. Contributors: Harry P. Bowen, Michele Ca' Zorzi, Jean-Philippe Cotis, Romain Duval, Christoph Fischer, Michael S. Knoll, Inmaculada Martínez Zarzoso, Wim Moesen, Felicitas Nowak, Lehmann Xavier Sala-i-Martin, Bernd Schnatz, Alain de Serres, Eckhard Siggel, Sebastian Vollmer.

**Forests for Inclusive and Sustainable Economic Growth** Purabi Saikia, Amit Kumar, Mohammed Latif Khan, Xiangdong Lei, 2025-05-23 Forests for Inclusive and Sustainable Economic Growth addresses all major issues surrounding forest resources, also including global examples, case studies, literature reviews, latest developments, and future research prospects. To enhance understanding, the content is enriched with maps, figures, tables, and colorful illustrations, making it accessible to a broad readership. Students specializing in forest ecology and researchers will discover a wealth of knowledge on critical topics such as major ecological disturbances, the role of forests in poverty reduction and livelihood security, as well as participatory forest management techniques, landscape restoration, forest policies, and nature-based solutions. Importantly, this comprehensive volume highlights the pivotal role of forests in fostering employment, income generation, and food security to support inclusive and sustainable economic growth. Includes case studies covering deforestation and forest degradation, forest carbon stocks, climate change, invasive species, and forest fires. Covers statistical modeling based and earth observation based methods and techniques. Divided into four sections and edited by
