Time Tense Reference

Joseph Henry Gilmore

Time Tense Reference:

Time, Tense, and Reference Aleksandar Jokić, Quentin Smith, 2003 Original essays by philosophers of language and philosophers of time exploring the semantics and metaphysics of tense **Essays on Tensing in English: Reference time, tense, and adverbs** Alfred Schopf, 1987 **Event Structure and the Left Periphery** Katalin É. Kiss, 2007-11-07 Katalin Kiss of the Hungarian Academy of Sciences in Budapest has brought together in this volume substantial new results in a novel field of research The text analyzes the syntactic and semantic consequences of event structure The studies contained in this volume test the hypothesis that event structure correlates with a number of things including word order the presence or absence of the verbal particle and the specific feature of the internal argument **A Student's Advanced Grammar of English (SAGE)** Peter Fenn, 2022-06-13 Whatever kind of high level language user you are college or university student serving language teacher or advanced school learner A Student's Advanced Grammar of English SAGE offers you support information and further training SAGE is a reference work as well as a programmed refresher course with exercises on the accompanying website and a structured teaching aid It serves as a spot check in specific cases of uncertainty But it also answers broader queries and provides comprehensive insights into the major structural areas of English Its concern is not simply grammar but above all usage SAGE is easy to comprehend and non specialist in method All grammatical terminology is explained in a simple and straightforward manner On the other hand SAGE takes account of current research in language studies In catering especially for the user with a native German background SAGE treats many areas of English from a contrastive point of view highlighting those phenomena which cause typical problems in a German based learning context The second edition has been thoroughly revised **Type-Logical Semantics** Bob Carpenter, 1998-07-24 Based on an introductory course on natural language semantics this book provides an introduction to type logical grammar and the range of linguistic phenomena that can be handled in categorial grammar It also contains a great deal of original work on categorial grammar and its application to natural language semantics The author chose the type logical categorial grammar as his grammatical basis because of its broad syntactic coverage and its strong linkage of syntax and semantics Although its basic orientation is linguistic the book should also be of interest to logicians and computer scientists seeking connections between logical systems and natural language The book which stepwise develops successively more powerful logical and grammatical systems covers an unusually broad range of material Topics covered include higher order logic applicative categorial grammar the Lambek calculus coordination and unbounded dependencies quantifiers and scope plurals pronouns and dependency modal logic intensionality and tense and aspect The book contains more mathematical development than is usually found in texts on natural language an appendix includes the basic mathematical concepts used throughout the book *A Reference Grammar of Modern Standard Arabic* Karin C. Ryding, 2005-08-25 A Reference Grammar of Modern Standard Arabic is a comprehensive handbook on the structure of Arabic Keeping technical

terminology to a minimum it provides a detailed yet accessible overview of Modern Standard Arabic in which the essential aspects of its phonology morphology and syntax can be readily looked up and understood Accompanied by extensive carefully chosen examples it will prove invaluable as a practical guide for supporting students textbooks classroom work or self study and will also be a useful resource for scholars and professionals wishing to develop an understanding of the key features of the language Grammar notes are numbered for ease of reference and a section is included on how to use an Arabic dictionary as well as helpful glossaries of Arabic and English linguistic terms and a useful bibliography Clearly structured and systematically organised this book is set to become the standard guide to the grammar of contemporary Arabic

The Mother Tongue: An elementary English grammar, by G.L. Kittredge and S.L. Arnold Sarah Louise Arnold, George Lyman Kittredge, John Hays Gardiner, 1900

Modes of Discourse Carlota S. Smith, 2003-04-17 In studying discourse the problem for the linguist is to find a fruitful level of analysis Carlota Smith offers a new approach with this study of discourse passages units of several sentences or more She introduces the key idea of the Discourse Mode identifying five modes Narrative Description Report Information Argument These are realized at the level of the passage and cut across genre lines Smith shows that the modes intuitively recognizable as distinct have linguistic correlates that differentiate them She analyzes the properties that distinguish each mode focusing on grammatical rather than lexical information The book also examines linguistically based features that appear in passages of all five modes topic and focus variation in syntactic structure and subjectivity or point of view Operating at the interface of syntax semantics and pragmatics the book will appeal to researchers and graduate students in linguistics stylistics and rhetoric

Cognitive English Grammar Günter Radden, René Dirven, 2007 Cognitive English Grammar is designed to be used as a textbook in courses of English and general linguistics It introduces the reader to cognitive linguistic theory and shows that Cognitive Grammar helps us to gain a better understanding of the grammar of English The notions of motivation and meaningfulness are central to the approach adopted in the book In four major parts comprising 12 chapters Cognitive English Grammar integrates recent cognitive approaches into one coherent model allowing the analysis of the most central constructions of English Part I presents the cognitive framework conceptual and linguistic categories their combination in situations the cognitive operations applied to them and the organisation of conceptual structures into linguistic constructions Part II deals with the category of things and their linguistic structuring as nouns and noun phrases It shows how things are grounded in reality by means of reference quantified by set and scalar quantifiers and qualified by modifiers Part III describes situations as temporal units of various layers internally as types of situations and externally as located relative to the time of speech and grounded in reality or potentiality Part IV looks at situations as relational units and their structuring as sentences Its two chapters are devoted to event schemas and space and metaphorical extensions of space Cognitive English Grammar offers a wealth of linguistic data and explanations The didactic quality is guaranteed by the frequent use of
