Master Passions Mihnea Moldoveanu, Nitin Nohria, 2002-03-15 An exploration of the powerful role of anxiety ambition and envy in shaping both our individual lives and society as a whole At the heart of the human experience lies anxiety caused by the realization that the world is unknown forever eluding our control And out of this anxiety arises the master passions of ambition and envy which we repress to mask their power over our lives Discussion of the role of the emotions in our lives is not new but Mihnea Moldoveanu and Nitin Nohria go much further showing how these passions shape not only our individual lives but our social and organizational culture as well The master passions are not pretty and so we cover them with the more socially acceptable faces of reason and morality Moldoveanu and Nohria guide the reader in revealing the real impetus behind such actions as firing a friend leaving a lover or even pillaging your own people Below the rational explanation they show often lies a willingness to hurt or even destroy others to fuel our own ambitions or quench the fires of envy The authors offer intriguing thought experiments and examples from their own lives as they expose the power of the master passions Deftly weaving ideas from psychology Sigmund Freud sociology Max Weber literature William Shakespeare Albert Camus and philosophy David Hume Adam Smith Karl Marx Friedrich Nietzsche with the personal they build a strong argument that society would be much healthier if we faced the deception and self deception that pervade our lives

Kingdom of the Sick Susan L. Burns, 2019-05-31 In this groundbreaking work Susan L Burns examines the history of leprosy in Japan from medieval times until the present At the center of Kingdom of the Sick is the rise of Japan's system of national leprosy sanatoria which today continue to house more than 1 500 former patients many of whom have spent five or more decades within them Burns argues that long before the modern Japanese government began to define a policy toward leprosy the disease was already profoundly marked by ethical and political concerns and associated with sin pollution heredity and outcast status Beginning in the 1870s new anxieties about race and civilization that emanated from a variety of civic actors including journalists doctors patent medicine producers and Christian missionaries transformed

leprosy into a national issue After 1900 a clamor of voices called for the quarantine of all sufferers of the disease and in the decades that followed bureaucrats politicians physicians journalists local communities and leprosy sufferers themselves grappled with the place of the biologically vulnerable within the body politic At stake in this citizenship project were still evolving conceptions of individual rights government responsibility for social welfare and the delicate balance between care and control Refusing to treat leprosy patients as simply victims of state power Burns recovers their voices in the debates that surrounded the most controversial aspects of sanitarium policy including the use of sterilization segregation and the continuation of confinement long after leprosy had become a curable disease Richly documented with both visual and textual sources and interweaving medical political social and cultural history Kingdom of the Sick tells an important story for readers interested in Japan the history of medicine and public health social welfare gender and sexuality and human rights

Warren, 2019-06-14 War and landpower's role in the twenty first century is not just about military organizations tactics operations and technology it is also about strategy policy and social and political contexts After fourteen years of war in the Middle East with dubious results a diminished national reputation and a continuing drawdown of troops with perhaps a future force increase proposed by the Trump administration the role of landpower in US grand strategy will continue to evolve with changing geopolitical situations Landpower in the Long War Projecting Force After 9 11 edited by Jason W Warren is the first holistic academic analysis of American strategic landpower Divided into thematic sections this study presents a comprehensive approach to a critical aspect of US foreign policy as the threat or ability to use force underpins diplomacy The text begins with more traditional issues such as strategy and civilian military relations and works its way to more contemporary topics such as how socio cultural considerations effect the landpower force It also includes a synopsis of the suppressed Iraq report from one of the now retired leaders of that effort The contributors made up of an interdisciplinary team of political scientists historians and military practitioners demonstrate that the conceptualization of landpower must move beyond the limited operational definition offered by Army doctrine in order to encompass social changes trauma the rule of law acquisition of needed equipment civil military relationships and bureaucratic decision making and argue that landpower should be a useful concept for warfighters and government agencies **Osirus** Joseph James Coughlin, 1911
