Total Texting:

Total Texting Helen Knight, 2001-06-28 Cell phones aren't just for talking anymore. Using the text rather than the voice function on any cell phone, messages can be sent from one cell phone to another. It's called short text messaging (SMS) and it's all the rage among teens in Europe and Asia. Because phones are limited in the number of characters they can transmit, a whole language using abbreviations and codes has emerged. Texting has become so hot that industry reports show it has grown from about a billion messages a month in summer 1999 to 15 billion a month by December 2000. Teens love it because it's cheaper and more convenient than a phone call and most important, it's private. And now it's poised to take over North America. All the major digital phone service providers are pushing SMS and are targeting teens as their market. These four Little Books are the perfect sourcebooks for this new communications wave, mixing how-tos with phrases and hands-on advice with sample messages. In *Get Texting*, readers will discover everything they need to know to get started. *Total Texting* shows how to get the most from your phone, plus lots more. *Keep Texting* offers jokes, quizzes, and taglines. And *Love Texting* provides bonafide ways to date and chat.

Bureau of Educational Research, 1918 Abstract Entity Anaphora in Argumentative Texts Donghong Liu, 2023-08-21 This book focuses on abstract entity anaphora in argumentative texts with Asher s 1993 Segmented Discourse Representation Theory SDRT as the theoretical framework investigating its pragmatic features and exploring its referent interpretation The data sources include more than 160 000 word argumentative texts 80 000 word English texts and 80 000 word Chinese ones selected from newspapers journals and books in China and America At first a comparative study was done between Chinese and English argumentative texts so as to compare the pragmatic features of abstract entity anaphora in the two languages Then referent interpretation is explored within the SDRT framework Although SDRT can account for most of the instances of abstract entity anaphora it appears incompetent in

dealing with some phenomena in the data of our study Seven problems in SDRT were found and corresponding solutions were proposed in an attempt to improve this theory In general this book has three aspects of significance Firstly it establishes abstract entity anaphora as an independent and a special kind of anaphora Secondly the research methods are the combination of empirical study and theoretical hypotheses as well as the coalescent of dynamic study and static study Thirdly the book is not limited to the application of SDRT to Mandarin Chinese and backward anaphora Instead based on the linguistic phenomena in the data it challenges and improves the theory and it even negates some aspects and meanwhile brings forward new solutions
