Soil Conservation Service Curve Number (SCS-CN) Methodology S.K. Mishra,V.P. Singh,2013-03-14 The Soil Conservation Service SCS curve number CN method is one of the most popular methods for computing the runoff volume from a rainstorm It is popular because it is simple easy to understand and apply and stable and accounts for most of the runoff producing watershed characteristics such as soil type land use hydrologic condition and antecedent moisture condition The SCS CN method was originally developed for its use on small agricultural watersheds and has since been extended and applied to rural forest and urban watersheds Since the inception of the method it has been applied to a wide range of environments In recent years the method has received much attention in the hydrologic literature The SCS CN method was first published in 1956 in Section 4 of the National Engineering Handbook of Soil Conservation Service now called the Natural Resources Conservation Service U S Department of Agriculture The publication has since been revised several times However the contents of the methodology have been nonetheless more or less the same Being an agency methodology the method has not passed through the process of a peer review and is in general accepted in the form it exists Despite several limitations of the method and even questionable credibility at times it has been in continuous use for the simple reason that it works fairly well at the field level

Distributed Computer Control Systems 1986 K.D. Muller,M.G. Rodd,2014-05-23 This seventh IFAC workshop on distributed control systems DCCS discusses the ideas of real time synchronization and data consistency in industry with emphasis on the Manufacturing Automation Protocol MAP The volume also debates the gulf between the computer scientist s approach to language and the needs of the application programmer In addition to treating relevant topics each session has an introductory paper and a panel discussion to give a complete picture of the progress and research in this computer field today

Handbook of Parallel Computing and Statistics Erricos John Kontoghiorghes,2005-12-21 Technological improvements continue to push back the frontier of processor speed in modern computers Unfortunately the computational intensity demanded by modern research problems grows even faster Parallel computing has emerged as the most successful bridge to this computational gap and many popular solutions have emerged based on its concepts

Scientific Computing Michael T. Heath,2018-11-14 This book differs from traditional numerical analysis texts in that it focuses on the motivation and ideas behind the algorithms presented rather than on detailed analyses of them It presents a broad overview of methods and software for solving mathematical problems arising in computational modeling and data analysis including proper problem formulation selection of effective solution algorithms and interpretation of results In the 20 years since its original publication the modern fundamental perspective of this book has aged well and it continues to be used in the classroom This Classics edition has been updated to include pointers to Python software and the Chebfun
