Management brings together a collection of seminal papers from Palgrave's journal *Maritime Economics and Logistics*. It is a dynamic volume containing contributions from leading authors with different disciplinary backgrounds representing a vast regional diversity. The volume provides authoritative and timely investigations into key topics in port economics including research on global supply chains, port networks, choice modelling, port infrastructure, competition, port pricing, efficiency in European seaports, and an analysis of Chinese container ports. It is essential reading for professionals, scholars, and researchers interested in port economics.

*Freight Transport Planning and Logistics* Lucio Bianco, Agostino La Bella, 1988-09-14

Improvements in the performance of a freight transport system can be achieved either through technological innovation or by using advanced planning tools. This volume includes contributions on planning which cover the following topics: analysis of current trends in developed countries, demand analysis and forecasting, flows simulation and prediction, shipment and delivery problems, regulation problems, investment evaluation. Papers consider such applications as warehouse location, crude oil transportation, newspaper distribution, the trucking industry, rail planning, and seaport systems. Transport issues in North America and Italy are described and compared. The papers in this volume are revised versions of contributions to the International Seminar on Freight Transport Planning and Logistics held in Bressanone, Italy, in July 1987.
