Erickson, 2025-09-30 This handbook is an innovative recasting and reinterpretation of modern Turkish history centered on war and society It covers much neglected conflicts and wars and provides new insights about its complex politics military diplomacy and people The Turkish Republic was born after a series of wars which dismantled the Ottoman Empire and left the foundation of a state with new and reduced borders Turkey s foreign policy has been characterized for the last century by Mustafa Kemal Atat rk s principle of peace at home peace in the world but in practice it has had to fight foreign wars outside of its geography and battle counterinsurgency inside its borders against various rebel movements Although wars and conflicts were instrumental in shaping Turkey they have received very little scholarly attention and they are mostly absent in western studies of modern Turkey Rather than advocating for a single accepted interpretation of Turkish history this book aims to highlight the complexity of modern Turkish history and the diversity in interpretations Presenting a coherent and condensed history of modern Turkey in a reader friendly way this handbook offers students and general readers the sound background to better understand Turkey within its international and transnational context      The Ottoman State and its Place in World History K.H. Karpat, 2022-04-25      **Ottoman and Republican Turkish Labour History: Volume 17** Touraj Atabaki, Gavin Brockett, 2009-12-17 Examines Ottoman and republican Turkish social and labour history from the end of the nineteenth century to the early 1950s      *Cassel's Illustrated History of the Russo-Turkish War* Edmund Ollier,      **Current History** , 1922      **Minorities and Nationalism in Turkish Law** Derya Bayir, 2016-04-22 Examining the on going dilemma of the management of diversity in Turkey from a historical and legal perspective this book argues that the state s failure to accommodate ethno religious diversity is attributable to the founding philosophy of Turkish nationalism and its heavy penetration into the socio political and legal fibre of the country It examines the articulation and influence of the founding principle in law and in the higher courts jurisprudence in relation to the concepts of nation citizenship and minorities In so

doing it adopts a sceptical approach to the claim that Turkey has a civic nationalist state not least on the grounds that the legal system is generously littered by references to the Turkish ethnies and to Sunni Islam. Also arguing that the nationalist stance of the Turkish state and legal system has created a legal discourse which is at odds with the justification of minority protection given in international law, this book demonstrates that a reconstruction of the founding philosophy of the state and the legal system is necessary without which any solution to the dilemmas of managing diversity would be inadequate. Adopting an interdisciplinary approach, this timely book will interest those engaged in the fields of Middle Eastern Islamic Ottoman and Turkish studies as well as those working on human rights and international law and nationalism.
