**Viruses, Immunity, and Immunodeficiency** Andor Szentivanyi, Herman Friedman, 2012-12-06 This publication *Viruses Immunity and Immunodeficiency* is based on the first symposium in a series of International Biomedical Symposia sponsored by the College of Medicine of the University of South Florida in Tampa Florida There is an explosive interest concerning the effects of viruses on the immune response especially the immunosuppressive effects of viral infection This has come about because of the recognition that the Acquired Immunodeficiency Syndrome which has taken biomedical scientists and the public in general by surprise is just one of the many examples that viruses can influence the immune response system and under appropriate circumstances alter immunity in such a way that an infected individual becomes highly susceptible to a variety of other organisms to which normal individuals would be resistant This symposium series sponsored by the University

of South Florida College of Medicine brings to the biomedical community topics of current interest. We thank the members of the faculty of various departments of the College of Medicine and the administration of the College for their support and encouragement in having these symposia at this medical school. This volume based on this symposium on viruses and immunity is a good example of the interdisciplinary nature of modern microbiology and modern biomedical science in general. Many investigators with many different backgrounds and training experiences including microbiologists, immunologists, biochemists, oncologists, and physicians are interested in how and why viruses influence the immune response system.
