Forge Work William L. Ilgen, 2015-06-02 William L Ilgen s book Forge Work is an instructional text detailing metalwork and more specifically working with a forge The original purpose of the book as outlined in the author s preface was to commit to text many of the oral instructions provided to metalworking and blacksmithing students so that they may have a reference document to which they can refer Divided into eight chapters Forge Work is a thorough and expansive reference book The book begins with an introduction to the tools and appliances commonly used by smiths Ilgen s writing is accessible for the layperson so much so that a reader with no experience in forging could comfortably make this book their introduction into the craft From his introduction to the tools Ilgen progresses to a discussion of some specific forging operations including straightening twisting welding and scarfing among many others The author outlines various practice exercises to be used by students of metalworking so as to improve their skills and understanding of the craft Later chapters cover more advanced topics such as the treatment of steel tool making art smithing and scroll work Pictures are included throughout however many have unfortunately not survived republication William L Ilgen s Forge Work is a success as both a textbook for students of metal work and as a reference book for those more experienced in the craft The index that concludes the book is invaluable and the clear and concise directions throughout make for an illuminating read While other books have been published on the topic few cover the information with as much depth and breadth as Forge Work About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Forge Work William Lewis Ilgen, 1912 **Forge 11.2** Forge, 2017-10-31 Featuring works by Sharon Barr Nancy Bourne Linda Carela Z Z Boone Heather Leah Huddleston Raymond Abbott Burton Shulman Mike Siemasz Heather Whited Richard Kostelanetz Simon Perchik and Don Swartzentruber Edited by Tim McLafferty and Leif Milliken **Elementary Forge Practice** Robert H. Harcourt, 2015-06-02 Excerpt from Elementary Forge Practice A Text Book for Technical and Vocational Schools While it is realized that a comprehensive knowledge of forge practice can be gained only thru contact with a commercial shop doing a wide variety of work it is at the same time believed that an understanding of fundamental principles may be secured thru a carefully planned and conducted course of instruction in a technical school This book is designed to assist the student in grasping fundamental principles To this end a series of projects involving fundamental operations has been devised It may be unnecessary for some students to complete the entire set Some of the earlier projects and occasionally others may be omitted if the student has had previous practice or if he shows great facility On the other hand it will be readily seen that there is a logical order in the series and that some projects must be mastered before others are

undertaken The whole set may require a longer time than is allotted to the subject in the average manual training course In such case the instructor may easily select such work as will meet the peculiar conditions The criticism given an earlier edition by the technical press and the reception by teachers of forge and machine shop practice have shown the need for a text book of this type The author wishes to express his appreciation of the assistance rendered by Professor E P Lesley of Leland Stanford Junior University Mr W L Rifenberick and Mr H P Miller Jr in the preparation of this book About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
