Earth and Gods V. Vycinas, 2012-12-06 Earth and Gods is an attempt to introduce the reader to Heidegger's fully developed philosophy The title Earth and Gods gives an impression of not being a general study of Heidegger's philosophy However this is not true the earth and the gods are fundamental ontological symbols of his fully developed philosophy namely his third and final phase of thought This phase repeats the problems of both preceding phases in a fuller and more developed manner hence it implies them The two preceding phases are the phase of Dasein and the phase of Being These two phases are a natural flow of fundamental problems which reach their final formation and development in the phase of earth and gods Dasein the first phase leads to Being and Being the second phase bursts into fundamental ontological powers of Being Seinsmiichte which are earth and sky gods and mortals the third phase Since earth is unthinkable without sky and since gods are gods in the world of mortals of men the title Earth and Gods is an abbreviation of these four fundamental powers of Being Hence an investigation of earth and gods is an attempt to present Heidegger's philosophy as a whole Such a presentation provides the reader with the background necessary for a more adequate and efficient understanding of the writings of Heidegger himself Thus Earth and Gods may rightly be considered an introduction to Heidegger's philosophy
