Samuel Hough Terry

The Future Of Time:

Future Time Perspective and Motivation Joseph Nuttin, 2014-04-04 First published in 1985 The present volume is a theoretical and methodological supplement to the Nuttin's book *Motivation planning and action* A relational theory of behaviour dynamics in which he showed that behaviour dynamics in man due to their interaction with higher cognitive functioning are processed into goals and means end structures that is behavioural projects or plans The main purpose of the theoretical section of this book is to contribute to the integration of the future time dimension on the study of human motivation and behaviour The main part is then devoted to a two step method for studying the content and density of a person's future time perspective and for measuring its depth or extension

Knowing Future Time In and Through Greek Historiography Alexandra Lianeri, 2016-03-07 From the early modern period Greek historiography has been studied in the context of Cicero's notion *historia magistra vitae* and considered to exclude conceptions of the future as different from the present and past Comparisons with the Roman Judeo Christian and modern historiography have sought to justify this perspective by drawing on a category of the future as a temporal mode that breaks with the present In this volume distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in Greek historiography from Herodotus to Appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity They look both at contemporary scholarly argument and the writings of Greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion By reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time

The Future of Work, Employment and Social Protection Peter Auer, Bernard Gazier, 2002 This volume comprises the papers and debates of the second France ILO Symposium on the future of work employment and social protection Reflecting the aim of the Symposium itself the book provides in depth reflections on work employment and social protection Designed to be more than an account of the discussions this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets particularly in the developed world The book discusses the need for more family friendly policies and a more radical policy of equality between the sexes The legal dimensions of labour market change are also debated and the book explores the positive and negative sides of globalization and its links with technological change
