Indonesia Human Rights Watch (Organization), 2003 Recommendations New order forestry policy and the roots of the crisis Missed opportunities for reform Human rights abuses Role and responsibility of the Indonesian government impunity Indigenous land rights Role and responsibility of Arara Abadi APP and the Sinar Mas group Role and responsibility of the international financial community Human rights and environmental degradation

Mainly Logging, 1974 *The Forest Emergency Recovery and Research Act* United States. Congress. House. Committee on Agriculture, 2006

The Fourth Circle John Fitzgerald McCarthy, 2006 This book analyzes the political legal and economic dynamics shaping environmental outcomes across two districts in Aceh one of the richest and most expansive areas of tropical rainforest in Southeast Asia Its central theme is that the present cycle of ecological decline can best be understood in terms of the way political economic and social forces operate at the district level

At the Edges of States Michael Eilenberg, 2012-01-01 Set in West Kalimantan Indonesian Borneo this study explores the shifting relationships between border communities and the state along the political border with East Malaysia The book rests on the premise that remote border regions offer an exciting study arena that can tell us important things about how marginal citizens relate to their nation state The basic assumption is that central state authority in the Indonesian borderlands has never been absolute but waxes and wanes and state rules and laws are always up for local interpretation and negotiation In its role as key symbol of state sovereignty the borderland has become a place where central state authorities are often most eager to govern and exercise power But as illustrated the borderland is also a place where state authority is most likely to be challenged questioned and manipulated as border communities often have multiple loyalties that transcend state borders and contradict imaginations of the state as guardians of national sovereignty and citizenship

Hearing Before the Committee on Agriculture House of Representatives, Wild Earth, 2002 *National Woodlands*, 2002 Handbook of Applied System Science Zachary Neal, 2016-11-25 The Handbook of Applied System Science is organized around both methodological approaches in systems science and the substantive topic to which these approaches have been applied The volume begins with an essay that introduces three system science methods agent based modeling system dynamics and network analysis The remainder of the volume is organized around three broad topics 1 health and human development 2 environment and sustainability and 3 communities and social change Each part begins with a brief introductory essay and includes nine chapters that demonstrate the application of system science methods to address research questions in these areas This handbook will be useful for work in Public Health Sociology Criminal Justice Social Work Political Science Environmental Studies Urban Studies and Psychology Chapter 14 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No
