

BIOHACKING

Biohacking is a term used to describe various tips and tricks for enhancing the body's ability to function at peak performance—and maybe even extend one's lifespan.

Biohacking involves personalized nutrition, physical enhancement, cognitive enhancement, technology integration, DIY biology, health optimization, and community knowledge sharing.

Biohacking has gained more attention and popularity in recent years. It is the practice of modifying or enhancing one's own body or biology using various methods, such as diet, supplements, devices, implants, or genetic engineering.

It focuses on enhancing energy levels, mental clarity, and overall health through dietary changes, physical activities, and cognitive enhancement.

Biohacking can have different goals, such as improving health, performance, well-being, or appearance, or exploring the limits and possibilities of human nature.

Biohacking's popularity boosts health, but some practices may involve experimental or unproven methods, requiring caution and expert guidance for optimal health optimization.

Do Not Go Gentle Kathleen Stock,2026-04-02 Do Not Go Gentle is a bracing often chilling wrestle with the ethical dilemmas surrounding the assisted death service a deeply unsettling read clear and powerful Kathleen Stock remains fearless endless thought provoking and always entertaining Nick Cave Admirably clear and cogent this is a polemic but a polite one Kathryn Hughes The Guardian Is there a right to die Is assisted death really compassionate Are we sleepwalking into a moral disaster In Do Not Go Gentle acclaimed writer and philosopher Kathleen Stock tackles one of the great debates of our time should we set up a system of assisted death With her trademark sharp thinking and dry wit the bestselling author of Material Girls argues that despite what some progressives might tell you assisted death will not give a person more freedom or control over

their lives Whether you have a terminal illness are in chronic pain or are disabled being able to ask your doctor to kill you fundamentally changes society s attitude towards the vulnerable and in a sinister direction Life is complex For some individuals an assisted death might be the right choice But we should be deeply wary of introducing a system that offers death as just another option especially when palliative care is so under resourced Expertly marshalling the arguments Stock s laser polemic cuts through the wishful thinking and clouded reasoning that surrounds the issue and reaffirms life rather than death as what we should be fighting for Collectively we should rage against the dying of the light
