Typological Studies Guglielmo Cinque, 2014-02-04 In this book Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses In particular Cinque looks at the position of the Head vis vis the relative clause in relation to the position of the verb vis vis his object a general cross linguistic analysis of correlatives the need to distinguish a sentence grammar from a discourse grammar type of non restrictives with languages differing as to whether they possess both one the other or neither a selective type of extraction from relative clauses and a tentative sketch of a more ample work in progress on a unified analysis of externally headed internally headed and headless relative clauses

English Coordinate Constructions Arne Lohmann, 2014-09-29 Drawing on extensive corpus based research this book explores the nature and behavior of coordinate constructions in three case studies covering order in copulative compounds binomials bare phrases and more complex phrases Historically research on order in coordination has concentrated on so called irreversible binomials but Lohmann s research places significant focus on reversible ad hoc coordination and also presents a detailed comparison between irreversible and reversible binomials This book uses empirical analyses to explore a wide range of factors ranging from pragmatic to phonetic influences on the ordering process It also offers readers a processing perspective on the results obtained and puts forth a processing explanation for the characteristics of irreversible binomials The book is ideal for researchers and advanced students working in English

The Grammar of Perspective Christopher Woods, 2008-05-31 The so called Sumerian conjugation prefixes are the most poorly understood and perplexing elements of Sumerian verbal morphology Approaching the problem from a functional typological perspective and basing the analysis upon semantics Professor Woods argues that these elements in their primary function constitute a system of grammatical voice in which the active voice is set against the middle voice The latter is represented by heavy and light markers that differ with respect to focus and emphasis As a system of grammatical voice the conjugation prefixes provided Sumerian speakers with a linguistic means of altering the perspective from which events may be viewed giving speakers a series of options for better approximating in language the infinitely graded spectrum of human conceptualization and experience Woods is to be commended for establishing a new precedent for analyzing Sumerian grammar which will hopefully become a model for future studies of the language Paul Delnero Johns Hopkins University
