*Style-shifting in Public* Juan Manuel Hernández Campoy, Juan Antonio Cutillas-Espinosa, 2012 Language acts are acts of identity and linguistic variation reflects the multifaceted construction of verbal alternatives for transmitting social meaning where style shifting represents our ability to take up different social positions due to its potential for linguistic performance rhetorical stance taking and identity projection Traditional variationist conceptualizations of style shifting as a primarily responsive phenomenon seem unable to account for all stylistic choices In contrast more recent formulations see stylistic variation as initiative creative and strategic in personal and interpersonal identity construction and projection making a significant contribution to our understanding of this aspect of sociolinguistic variation In this volume social constructivist approaches to style shifting are further developed by bringing together research which suggests that people make stylistic choices aimed at conveying and achieving a particular social categorization sociolinguistic meaning and or to project a specific positioning in society Therefore there is a need we collectively argue to adopt permeable and flexible multidimensional multidisciplinary and interdisciplinary approaches to speaker agency that take into consideration not only reactive but also proactive motivations for stylistic variation and where individuals rather than groups and their strategies are the main focus when examining style shifting in public This book will be of interest to advanced students and academics in the areas of sociolinguistics dialectology social psychology anthropology and sociology Style and Stylistics Graham Hough, 1977 **A Socio-Linguistic and Stylistic Study** Pratibha Verma, 2017-04-17 Why are Dickens characters so fascinating In spite of the exaggeration in the portrayal why do they appear realistic Here you will learn Dickens position in the tradition of the novel Contrast and comparison with other novelists Characters from different social regional backgrounds each having his her typical expressions Speech variation in inter personal relationship power topic and situation Linguistic prejudices use of jargons communication skills misunderstandings among other devices enriching speech depiction in Dickens novels Dickens stylistic innovations and specialities co related with techniques insights of modern linguistics **A Corpus-Driven Approach to Stylistic Analysis of a Lexical Richness Curve** Khalid Shakir Hussein, Ali Hussein Abdul-Ameer, 2017-02-14 Scientific Study from the year 2017 in the subject English Language and Literature Studies Literature Thi Qar University College of Arts language English abstract This book is an attempt to explore the lexical richness of certain well known literary texts using a statistical gauge called lexical richness curve The analysis conducted throughout this scientific study is corpus based and a recent version of WordSmith Tools 0 7 is used to process the basic statistical frequencies of types and tokens The study depends basically on a wordlist tool used to analyze digital samples of six novels written by three grand novelists Virginia Woolf s *The Waves* and *To the Lighthouse* James Joyce s *Ulysses* and *A Portrait of the Artist as a Young Man* and William Faulkner s *Light in August* and *The Sound and Fury* Fifteen samples are taken randomly from each novel with 1000 tokens intervals so the overall samples used in the study are 90 samples Then

each sample is statistically analyzed to find about its lexical richness The number of the types distinct vocabulary words and the number of the tokens words are counted for each sample The ratio of types and tokens are presented visually by using Microsoft Office Excel diagrams This will facilitate a rigorous process of figuring out the lexical richness of each novel It is quite evident that Joyce s Ulysses holds the highest rate of lexical richness while Faulkner s Light in August reserves the lowest lexical richness curve As for Woolf her novels are located somewhere in the middle with an exceptional approaching observed in The Waves to Joyce s Ulysses in some textual samples Moreover it is an evident feature that the type token curves for Joyce s A Portrait of the Artist as a Young Man and Woolf s To the Lighthouse are virtually reciprocal indicating an exceptional similarity in their lexical repertoires
