Qur'anic Stylistics Hussein Abdul-Raof,2004 Stylistic variation is the colourful manifestation of language It is an intriguing linguistic phenomenon that can take place at different levels of language as it has been found in Qur'anic genre Stylistic shift can occur within the sentence boundary at both the micro and the macro levels In the micro text stylistic variation occurs at the morpheme word and sentence levels However in the macro text stylistic change can occur at the macro textual level beyond the sentence boundary In other words stylistically different sentences are found at different texts far away from each other Stylistic variation mirrors language behaviour and the manipulation of the linguistic tools and strategies available to the text producer Stylistic variation in Qur'anic Arabic occurs for a good reason and is context and co-text sensitive Context and co-text are the linguistic habitat for stylistic shift The surrounding grammatical semantic and phonetic environment has a direct impact upon the linguistic behaviour of Qur'anic genre This is due to the fact that the text unfolds in a given context of situation Therefore the distinctive stylistic patterns are influenced by the contextual and co-textual factors A linguistic stylistic exploration of sentence patterns illuminates the reader's appreciation of the grammatical and semantic subtleties underpinning the distinct meanings of two stylistically different but structurally identical sentences A linguistic investigation of the stylistic patterns of language also unearths the underlying signification of two stylistically distinct sentences The present analysis attempts to provide an insight into the resourceful stylistic and linguistic strategies of Arabic The book sharpens up the reader's awareness of the exotic stylistic patterns that are semantically oriented These stylistic structures can be realized through various linguistic processes that are specific to Arabic The resourceful mechanism can be a useful linguistic tool to achieve various communicative functions with different semantic significations The present account of Qur'anic genre explores how grammatical acceptability and semantic syntax are interrelated to stylistic variation in Arabic This work provides an in-depth explicated analysis of stylistic variation in Qur'anic genre

**Basic Concepts of Poetics** Emil Staiger, 2010-11-01 *Rethinking 'Authority' in Late Antiquity* A.J. Berkovitz, Mark Letteney, 2018-06-14 The historian's task involves unmasking the systems of power that underlie our sources A historian must not only analyze the content and context of ancient sources but also the structures of power authority and political contingency that account for their transmission preservation and survival But as a tool for interpreting antiquity authority has a history of its own As authority gained pride of place in the historiographical order of knowledge other types of contingency have faded into the background This book's introduction traces the genesis and growth of the category describing the lacuna that scholars seek to fill by framing texts through its lens The subsequent chapters comprise case studies from late ancient Christian and Jewish sources asking what lies beyond authority as a primary tool of analysis Each uncovers facets of textual and social history that have been obscured by overreliance on authority as historical explanation While chapters focus on late ancient topics the methodological intervention speaks to the discipline of history as a whole Scholars of classical antiquity and the early medieval world will find immediately analogous cases and applications Furthermore the critique of the place of authority as used by historians will find wider resonance across the academic study of history
