

Favorite School Subject

My favorite school subject is science. I like it because it helps me understand the world around me. Science is full of experiments and discoveries. I enjoy learning about animals, plants, and how things work. My favorite part is when we do experiments in the lab. It's fun to see how things change and react when we mix different materials.

Science also teaches us about space, the stars, and the planets. I love thinking about how big the universe is and wondering what might be out there. I find it amazing how scientists discover new things every day and help improve our lives.

I also like learning about the Earth and how we need to take care of it. Topics like recycling, saving water, and protecting nature are important. Science makes me want to be a better person and help the environment.

Science is not just about facts; it's about asking questions and finding answers. I enjoy reading about new discoveries and thinking about how things work. That's why science is my favorite subject.

On Being Normal and Other Disorders Paul Verhaeghe,2020-06-16 The central argument of On Being Normal and Other Disorders is that psychic identity is acquired through one s primary intersubjective relationships Thus the diagnosis of potential pathologies must also be founded on this relation Given that the efficacy of all forms of treatment depends upon the therapeutic relation a diagnostic of this sort has wide ranging applications The author s critical evaluation of the contemporary DSM diagnostic shows that the lack of reference to and governing metapsychology impinges on the therapeutic value of the DSM categories In response to this problem the author sketches out the foundations of such a metapsychology by combining a Freudo Lacanian approach with contemporary empirical research Close attention is paid to the processes of identity acquisition to show how the self and the Other are not two separate entities Rather subject formation is seen as a process in which both the subject s and the Other s identity as well as the relationship between them comes into being
