Sudan Contested National Identities:

The Sudan Ann Mosely Lesch, 1998 This highly informative work digs into the intricate history of Sudanese politics Lesch brings a welcome clarity to Sudan's tangle of political ethnic and religious problems by concentrating on the country's central dilemma the inability of its leaders to negotiate a common definition of nationhood Foreign Affairs the first correct account of what took place after independence Robert O Collins The Sudan is torn by ethnic and religious conflict centered on the struggle over the definition of the Sudanese nation state Is the Sudan primarily Arab or African by culture and ethnicity Should the political system privilege Islamic legal codes or accord equal citizenship to persons of all faiths Ann Mosely Lesch provides a comprehensive and even handed analysis of the unresolved struggle for a stable political system and a unified national identity

National Identity and State Formation in Africa Manuel Castells, Bernard Lategan, 2021-03-17 This book examines how the interplay between globalization and the assertion of local identities is reshaping the political landscape of Africa While defending their values against external forces people simultaneously and paradoxically use the interconnectivity of global networks to maximize their particular interests Focusing on the relation between national identity and state formation the authors explore the far reaching consequences of these contradictory dynamics Although Africa shares many common trends with other parts of the world it also displays distinctive features A region characterized by the increased mobility of people goods and ideas challenges some conventional assumptions of statecraft and also highlights the advantages of federalism not merely as a constitutional option but as a pragmatic device for managing diversity and holding fragile states together The book further explores emerging types of state formation in the same political space as exemplified by the combination of elements of a kingdom an independent state and a national power base in the province of KwaZulu Natal and the careful crafting of an alternative state within a state by the Solidarity Movement in South Africa Informed by examples and case studies drawn from different parts of Africa this book will be of great interest to students and scholars of Africa politics sociology media studies and the social sciences more generally

Language, Religion and National Identity in Europe and the Middle East John Myhill, 2006-01-01 This book discusses the historical record of the idea that language is associated with national identity demonstrating that different applications of this idea have consistently produced certain types of results Nationalist movements aimed at unification based upon languages which vary greatly at the spoken level e.g. German Italian Pan Turkish and Arabic have been associated with aggression fascism and genocide while those based upon relatively homogeneous spoken languages e.g. Czech Norwegian and Ukrainian have resulted in national liberation and international stability It is also shown that religion can be more important to national identity than language but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal e.g. Jews Armenians Maronites Serbs Dutch and English this is demonstrated with discussions of the Holocaust the Armenian Genocide the civil war in Lebanon and the breakup of Yugoslavia the United

Netherlands and the United Kingdom **The Horn of Africa since the 1960s** Aleksí Ylönen, Jan Záhóřík, 2017-02-17 The Horn of Africa has long been one of the most dynamic and politically turbulent sub regions on the African continent Host to great ancient civilizations diverse peoples and expansive states the region has experienced massive social economic and political transformations which have given rise to military coups revolutions and intractable ethnic socio economic and religious conflicts This comprehensive volume brings together a team of expert scholars who analyze international regional national and local affairs in the Horn of Africa The chapters demonstrate the intertwined nature of the actors and forces shaping political realities The case studies focusing on Ethiopia Eritrea Somalia Somaliland Sudan and South Sudan eloquently illustrate the complex dynamics connecting the spectrum of political issues in the region The Horn of Africa since the 1960s will be of interest to students and scholars of contemporary Africa and political science Politics of Identity and Exclusion in Africa ,2001 Shrewd Sanctions Meghan L. O'Sullivan, 2004-05-13 Policymakers will need all the tools at their disposal to craft an effective response to international terrorism and to protect and promote other U S interests in the coming decades In this quest to shape the right strategies for the challenges ahead economic instruments will play a central role O Sullivan an expert on the use of positive and negative tools of economic statecraft argues that in the post September 11th international climate the United States will be even more willing to use its economic power to advance its foreign policy goals than it has in the past This impulse she argues can lead to a more effective foreign policy given the many ways in which sanctions and incentives can forcefully advance U S interests But a recalibration of these tools sanctions in particular is necessary in order for them to live up to their potential Critical to such a reassessment is a thorough understanding of how the post cold war international environment globalization and American primacy in particular has influenced how sanctions work O Sullivan addresses this issue in a thorough examination of sanctions dominated policies in place against Iran Iraq Libya and Sudan Her findings not only highlight the many ways in which sanctions have often been poorly suited to achieve their goals in the past but also suggest how policymakers might use these tools to better effect in the future This book will provide a valuable resource for policymakers groping to find the right set of instruments to address both the old and the new challenges facing the United States It will also serve as an important resource to those interested in U S policy toward rogue states and in the status of the sanctions debate between policymakers and scholars **Art, Politics, and Cultural Identification in Sudan** Mohamed A. Abusabib, 2004 It is now widely acknowledged that the issue of Sudan s cultural and political identity is one of the root causes of the Sudanese crisis that has crippled the country since its independence in 1956 and plunged it into a civil war regarded as the longest in Africa Nevertheless this issue continues to be a grossly neglected topic in scholarship concerning Sudan On the other hand the politics of intellectual and artistic production have been inseparable from the pivotal issue of identity ever since the advent of Sudanese nationalism in the 1920s But there has yet been no publication dedicated to the topic of identity as one of the major concerns in modern Sudanese artistic production

This study thus undertakes a critical examination of key discourses concerning the cultural basis of modern Sudanese literature visual art music and dance and it attempts to highlight their underlying political and ideological orientations The terms Arabism Afro Arabism Africanism Islamism and Sudanism have developed within these discourses as defining concepts describing the country s ethnic and cultural origins thereby serving as identity constructs The study also examines the relation between the political and the artistic institutions as well as the policy of the Islamization of the Arts launched by the present Islamist regime and its outcome The study may also be viewed as an endeavor to discover within the aesthetic field the missing Sudanese collective memory Stated otherwise this is an effort to redeem the lost Sudanese pedigree that has long been deliberately mystified misconceived and misconstrued for the for the sake of certain political and cultural strategies Another aim of the study is to introduce Sudanese arts and the specific Sudanese aesthetic political debate concerning the topics of culture and identity to both the general reader and specialists as well as to Africanists in general and scholars of African arts and literature in particular
