Human Aggression Robert A. Baron, 2013-04-17 also many newer lines of research to which I will return below are represented in various chapters And finally I have included a separate unit on methods for the study of aggression a feature that I believe to be unique to the present volume In these ways I have attempted to produce a text that is as broad and eclectic in coverage as I could make it While the present volume grew in part out of my desire to produce what I thought might prove to be a useful teaching aid it also developed out of a second major motive During the past few years a large number of new and to me exciting lines of investigation have emerged in rapid order These have been extremely varied in scope including among many others such diverse topics as the effects of sexual arousal upon aggression the impact of environmental factors e.g. heat noise crowding upon such behavior interracial aggression and the influence of heightened self awareness Despite the fact that such topics have already generated a considerable amount of research they were not to my knowledge adequately represented in any existing volume Given this state of affairs it seemed to me that a reasonably comprehensive summary of this newer work might prove both useful and timely

Social Dominance Jim Sidanius, Felicia Pratto, 2001-02-12

This volume focuses on two questions why do people from one social group oppress and discriminate against people from other groups and why is this oppression so mind numbingly difficult to eliminate The answers to these questions are framed using the conceptual framework of social dominance theory Social dominance theory argues that the major forms of intergroup conflict such as racism classism and patriarchy are all basically derived from the basic human predisposition to form and maintain hierarchical and group based systems of social organization In essence social dominance theory presumes that beneath major and sometimes profound difference between different human societies there is also a basic grammar of social power shared by all societies in common We use social dominance theory in an attempt to identify the elements of this grammar and to understand how these elements interact and reinforce each other to produce and maintain group based social hierarchy
