Working In Urban Schools:

Working in Urban Schools Tom Corcoran, Lisa J. Walker, J. Lynne White, 1988 This document on the working conditions of urban teachers reports data from a survey of 31 elementary middle and secondary schools in five urban school districts More than 400 interviews were conducted with teachers school administrators central office personnel district officials board members and union officials The observations interviews and analyses confirm that in most of these schools the working conditions of teachers are bleak and would not be tolerated in other professions Among the findings are the following 1 physical conditions are sub standard because of a lack of maintenance repair and space 2 safety is not a serious problem to teachers except in very depressed neighborhoods 3 teachers do not have even the basic resources needed let alone access to new technologies 4 teachers consider hiring more personnel to address the personal problems of students a higher priority than hiring more teachers to reduce class size 5 teachers generally understand the cultural gulf between them and their students but are unable to deal with what they consider aberrant student behavior 6 teachers perceive that they are losing control over what they teach primarily because of district wide testing policies although they are in control of how they teach and 7 teachers have little confidence in supervision staff development or central office leadership Characteristics of good working conditions are identified Tables illustrate the data Appendices compare these findings with those of other studies provide a list of about 100 references describe the methodology and compare school effects BJV

work showcasing the ways they have engaged with each other in joint work and with local government Through this the book supports a professional and politicized dialogue about teaching and teacher education offering a meaningful account of how to fashion a form of educative schooling for students and families with complex needs Written by a dynamic and experienced author this book brings Beckett s experience to bear on a controversial and complex area addressing the general trend towards increased regulatory policy in education It is an essential read for anyone interested in a rich analysis of how practitioners can work to reassert their professional voice and regain control of schools and teacher education and will also appeal to those interested in the larger project of restoring school democracy
