that must be crossed on the way to another place Using four European and two North American rivers as examples A Story of Six Rivers considers the place of rivers in our world and emphasizes the inextricable links between history culture and ecology Peter Coates explores six rivers chosen as examples of the types of rivers found on the planet the Danube the second longest river in Europe the Spree which flows through Berlin the Po which cuts eastward across northern Italy the Mersey in northwest England the Yukon which runs through Canada and Alaska and the Los Angeles in California Creating a series of river biographies Coates gives voice to each of these bodies of water exploring how rivers nurture us provide cultural and economic opportunities and pose threats to our everyday lives He challenges recent narratives that paint rivers as the victims of abuse pollution and damage at the hands of humans focusing on change rather than devastation Describing how humans and rivers form a symbiotic and sometimes mutually destructive relationship Coates argues that rivers illustrate the limits of human authority and that their capacity to inspire us is as strong as our ability to pollute them An intimate portrait of the way these bodies of water inform our lives A Story of Six Rivers will make us reconsider the streams and tributaries we traverse each day **The World's Work** ,1919 A history of our time Hells Canyon National Recreation Area United States.
