## **World Development Report 1989:**

**World Development Report 1996**, 1996 Almost one third of the world's population has embarked on a transition from planned to market economies. Like economic reforms elsewhere, the long-term goal of this transition is to build a thriving market economy capable of delivering long-term growth in living standards. Now in its 19th annual edition, the World Development Report 1996 takes an in-depth look at these transition countries, focusing on the key lessons that have taken place thus far. The introduction to the Report poses a number of key questions that are addressed in later chapters, including questions relating to initial challenges and how countries have tackled them from very different starting points and political conditions. The Report also focuses on the additional challenges these transition countries face, with a final chapter that summarizes the main conclusion of the Report, creating a text that will no doubt become the definitive source for students studying international economics and politics.

**World Bank World Development Report 1989**, *Theatre of the Rule of Law* Stephen Humphreys, 2010-11-11. *Theatre of the Rule of Law* presents a sustained critique of global rule of law promotion, an expansive industry at the heart of international development, post-conflict reconstruction, and security policy today. While successful in articulating and disseminating an effective global public policy, rule of law promotion has largely failed in its stated objectives of raising countries out of poverty and taming violent conflict. Furthermore, in its execution, this work deviates sharply from the rule of law as commonly conceived. To explain this, Stephen Humphreys draws on the history of the rule of law as a concept, examples of legal export during colonial times, and a spectrum of contemporary interventions by development agencies and international organisations. Rule of law promotion is shown to be a kind of theatre, the staging of a morality tale about the good life intended for edification and emulation, but blind to its own internal contradictions.

*World Development Report*, 1991. This report synthesizes and interprets the lessons of more than forty years of development experience. Together with last year's report on poverty and next year's on the environment, it seeks to provide a comprehensive overview of the development agenda. The 1990s began with dramatic changes as many countries in Eastern Europe and elsewhere initiated ambitious reforms of their economic and political systems. Against the backdrop of these transitions, this report links the historical debates that counseled policymakers in their past decisions, the lessons of experience, and the evolving thought on how best to proceed. One of the most valuable lessons relates to the interaction between the state and the market in fostering development. It describes a market-friendly approach in which governments allow markets to function well and in which governments concentrate their interventions on areas in which markets prove inadequate. The report looks at four main aspects of the relationship between governments and markets: a) investing in people, b) the climate for enterprises to flourish, c) the integration of countries with the global economy, and d) a stable macroeconomic foundation for sustained progress. The report stresses that above all, the future of developing countries is in their own hands. Domestic policies and institutions hold the key to successful development.
