World Literature Richard G. Moulton, 2015-06-15 Excerpt from *World Literature And Its Place in General Culture* This book presents a conception of World Literature not in the sense of the sum total of particular literatures but as a unity the literary field seen in perspective from the point of view of the English speaking peoples Theoretical treatment is throughout supplemented by exposition of masterpieces To the general reader the book suggests a rational scheme of connection such as should be at the back of every attempt to make choice of the best books For the student it illustrates a treatment of the subject unhampered by divisions between particular literatures in different languages divisions which make the weakness of literary study in our academic systems Its plea is that such World Literature belongs to every st of general culture from the most elementary to the most advanced My life has been entirely occupied with the study and the teaching of literature I have sought in the present work to embody the main results of my experience so far as these bear upon the field of literature and the general interest of the subject I purpose at no distant date to follow up this work with another which will be a more formal introduction to literary theory and interpretation About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Mihaela P. Harper, Dimitar Kambourov, 2020-11-12 *Bulgarian Literature as World Literature* examines key aspects and manifestations of 20th and 21st century Bulgarian literature by way of the global literary landscape. The first volume to bring together in English the perspectives of prominent writers, translators and scholars of Bulgarian literature and culture, this long overdue collection identifies correlations between national and world aesthetic ideologies and literary traditions. It situates Bulgarian literature within an array of contexts and foregrounds a complex interplay of changing internal and external forces. These forces shaped not only the first collaborative efforts at the turn of the 20th century to insert Bulgarian literature into the world's literary repository but also the work of contemporary Bulgarian diaspora authors. Mapping histories, geographies, economies and genetics, the contributors assess the magnitudes and directions of such forces in order to articulate how a distinctly national minor literature produced for internal use and nearly invisible globally until the last decade transforms into world literature today.
