Breaking Through Barbara Albers Hill,2014-01-30 While one on one therapy is certainly beneficial for some children the

process of developing social skills manual dexterity and educational competency presents much more of a challenge. Fortunately the introduction of new and easy to use technological devices has created a quiet revolution in the field of special education. It was only a decade ago that the iPad a portable interactive Internet device was introduced to the public. Apple's marketing people correctly predicted the iPad's popularity but they did not expect how uniquely appealing this device would be to children with autism attention issues physical challenges and a host of other learning disabilities. Today numerous tablets offer programs that can break through the barriers caused by psychological and physical challenges. To understand how you can optimize the use of these devices and select the best programs available best selling author and special education expert Barbara Albers Hill has written *Breaking Through Using Today's Tablet Technology with Special Needs Children*. The book is divided into two parts. Part One provides the basics of using this new technology. First it explains the many dimensions available in these machines animation color speech music reading and games. Then it examines how the interactive nature of these elements combine to capture the attention of children and draw them into any given activity. The book explores a range of individual learning differences such as ADHD autism spectrum disorder cerebral palsy low vision Down syndrome language impairment and traumatic brain injury and explains which type of programs are best suited for each challenge. Included are tips on adapting the device to a child's specific condition as well as practical safety advice. Part One concludes by discussing proven ways in which the programs can be integrated into home and school environments. Part Two provides a consumer's guide to available devices attachments and software programs making the book eminently helpful to both teachers and parents. If used correctly the tablet is a device that can help develop new pathways in the brain and facilitate learning socialization and motor skills. While we may call it a breakthrough in therapy you may call it nothing short of a miracle.
