Abstract. This article is devoted to the study of the impact of anthropogenic activities on the environment and the problems associated with sustainable nature management. The article discusses various types of anthropogenic activities, such as industry, agriculture, urban construction, transport, as well as its impact on the natural environment and biological diversity. Various methods of assessing the environmental consequences of anthropogenic activities and the problems associated with decision-making based on these assessments are considered. The article discusses the prospects for sustainable environmental management, which is based on the principles of environmental efficiency, economic viability and social justice. These principles are necessary to achieve a balance between the needs of humanity and the preservation of nature. The article considers the importance of taking measures to reduce the impact of anthropogenic activities on the environment. The article provides an overview of the problems associated with anthropogenic activities and their impact on the environment, as well as the prospects for sustainable nature management and methods of solving these problems. The article discusses the importance of cooperation between states and public organizations to achieve sustainable environmental management. One of the problems associated with sustainable environmental management is the need to take into account the needs of future generations. The article discusses the concept of "sustainable development", which involves meeting the needs of the current generation without compromising the needs of future generations. The article emphasizes the importance of education and informing society about the problems associated with anthropogenic activities and sustainable environmental management, as well as how each person can contribute to the preservation of the environment.

1 Introduction

The modern world cannot exist without anthropogenic activities that consume the needs of humanity, food, energy and other resources. Nevertheless, at the same time, the impact on the environment has been revealed, which has serious consequences for the ecological system and the biological diversity of the planet. Some types of anthropogenic activities, such as
