This book begins with the Double Set two chess set Single Platform one game board game. It involves Model I which is the StarFish or StingRay Model A maximum of four 4 chess players may engage in a Double Set game. This may involve two chess sets whereby each chess player controls one of the two halves of a single chess set. In another scenario the game may also involve two 2 chess players who may each control half of each of the two chess sets. As in the case that involves a match with three chess set games Player I you would need to Checkmate your opponents Kings twice to win the game. The other two chess players namely Player II and Player III need to Checkmate Player I your chess set only once to win the match. I attempt to make this book fun and interesting to read. In doing so by providing Diagrams, Illustrations, Drawings, and Photos about Game 2 the Double Set Single Platform game using Model I. This book also contains Equations or Statements that describe the movement of the chess pieces. This description involves the start of a chess piece's initial position on the game board to the end of the movement when the chess player moves that particular chess piece.
