the automobile and the bicycle With chapters ranging from the early science fiction of the pulp magazine era in the 1920s and 1930s to the postcyberpunk of the 1990s and more recent media of the 2000s such as web television zines and comics this book argues that science fiction by and large perceives the car as anything but a marvelous invention of modernity Rather the genre often scorns and ridicules the automobile and instead promotes more sustainable more benign more restrained technologies of movement such as the bicycle
