Henderson, 2009-02-17 Before modern binoculars and cameras made it possible to observe birds closely in the wild many people collected eggs as a way of learning about birds Serious collectors called their avocation oology and kept meticulous records for each set of eggs the bird's name the species reference number the quantity of eggs in the clutch the date and location where the eggs were collected and the collector's name These documented egg collections which typically date from the nineteenth and early twentieth centuries now provide an important baseline from which to measure changes in the numbers distribution and nesting patterns of many species of birds In [Oology and Ralph's Talking Eggs](#) Carrol L Henderson uses the vast egg collection of Ralph Handsaker an Iowa farmer as the starting point for a fascinating account of oology and its role in the origins of modern birdwatching scientific ornithology and bird conservation in North America Henderson describes Handsaker's and other oologists collecting activities which included not only gathering bird eggs in the wild but also trading and purchasing eggs from collectors around the world Henderson then spotlights sixty of the nearly five hundred bird species represented in the Handsaker collection using them to tell the story of how birds such as the Snowy Egret Greater Prairie Chicken Atlantic Puffin and Wood Duck have fared over the past hundred years or so since their eggs were gathered Photos of the eggs and historical drawings and photos of the birds illustrate each species account Henderson also links these bird histories to major milestones in bird conservation and bird protection laws in North America from 1875 to the present     **Catalog of Copyright Entries. **the Water's Edge** Betsy McCully, 2006-11-16 Concrete floors and concrete walls buildings that pierce the sky taxicabs and subway corridors a steady din of noise These things along with a virtually unrivaled collection of museums galleries performance venues media outlets international corporations and stock exchanges make New York City not only the cultural and financial capital of the United States but one of the largest and most impressive urban conglomerations in the world With distinctions like these it is possible to imagine the city as any more than this City at the Water's Edge invites readers to do just that Betsy McCully a long time urban dweller argues that this city of lights is much more than a human made metropolis It has a rich natural history that is every bit as fascinating as the glitzy veneer that has been built atop it Through twenty years of nature exploration McCully has come to know New York as part of the Lower Hudson Bioregion a place of salt marshes and estuaries sand dunes and barrier islands glacially sculpted ridges and kettle holes rivers and streams woodlands and outwash plains Here she tells the story of New York that began before the first humans settled in the region twelve thousand years ago and long before immigrants ever arrived at Ellis Island The timeline that she recounts is one that extends

backward half a billion years it plumbs the depths of Manhattan's geological history and forecasts a possible future of global warming with rising seas lapping at the base of the Empire State Building. Counter to popular views that see the city as a marvel of human ingenuity diametrically opposed to nature, this unique account shows how the region has served as an evolving habitat for a diversity of species, including our own. The author chronicles the growth of the city at the expense of the environment but leaves the reader with a vision of a future city as a human habitat that is brought into balance with nature.

*Library Newsletter* Florida State Library, 1963      *American Nature Writers* John Elder, 1996. The Scribner Writers Series has set the standard for literary reference for more than 25 years. In addition to addressing the lives and careers of important writers, the articles discuss the themes and styles of major works and place them in pertinent historical, social, and political contexts for today's readers. Novelists, playwrights, essayists, poets, short story writers, and more recently genre writers in science fiction and mystery are all expertly discussed in the more than 16 sets comprising this series. The essays in the set combine biography, criticism, and in some cases original interviews to tell the story of each author. This set includes 70 biographical critical essays on such writers as Rachel Carson, Ralph Waldo Emerson, Henry David Thoreau, and Gary Snyder, and 12 general subject essays.      **Earthly Words** John R.
