The Skeptical Environmentalist Bjørn Lomborg,2001-08-30 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media

Failed Transition, Bleak Future? Hooman Peimani,2002-04-30 Peimani challenges the practical indifference of many Western and non Western countries with interests in Central Asia and the Caucasus to their plight

Independence in 1991 suddenly worsened all the economic and social problems of the countries of the Caucasus Azerbaijan Armenia and Georgia and Central Asia Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan Their failure to address their numerous economic problems and to develop their economies has created a suitable ground for the rise of social and political popular dissent including ethnic conflicts in all these multi ethnic countries Concerned about the stability of their political systems their ruling elites have all opted for authoritarianism The prevailing intolerance of dissent and the suppression of opposition political parties have paved the way for the emergence of anti government extremist ideologies and political groups The domestic situation has become ripe for the rise of violent political activities and ethnic conflicts with a great possibility for their escalation to civil wars The ethnic structure of both the Caucasus and Central Asia makes their development into inter state wars a strong possibility The unsettled ethnic and territorial conflicts within and between countries which turned into wars in the early 1990s could easily re emerge There is a potential for the further escalation of military conflicts in those regions because of the intentional or unintentional intervention of Iran China Turkey Russia and the United States which have long term interests in the two regions Given the geographical characteristics of the Caucasus and Central Asia as a link between Asia and Europe war and instability in those regions could destabilize the two continents hosting six declared nuclear powers Of particular interest to scholars and other researchers involved with Eurasian Central Asian and Caucasian countries
