World Development Report World Bank, 1985 *The Politics of Global Competitiveness* Paul Cammack, 2022 Marx predicted in *Capital* 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness *Socio-Economic Development* Adam Szirmai, 2015-06-18 Taking a comparative and multidisciplinary approach this textbook offers a non technical introduction to the dynamics of socio economic development and stagnation *Innovating Development Strategies in Africa* Landry Signé, 2017-08-31 During the second half of the twentieth century African states shifted away from state led development strategies and are now moving towards a strategy of regional economic integration In this book Landry Signé explores the key drivers of African policy and economic transformation proposing a preeminent explanation of policy innovations in Africa through the examination of postcolonial strategies for economic development Scholars and practitioners in fields as varied as development studies political science and public policy economics sociology and African studies will benefit from Signé's
