This book examines nudging as a tool for influencing human behavior in health policy. The authors investigate the contemporary scientific discourse on nudging and enrich it with an ontological, epistemological, and praxeological analysis of human behavior. On the basis of detailed analyses of the literature and a systemic review, nudging tools are defined in the paradigm of prospect theory. In addition to the theoretical contribution, the book also examines and offers suggestions on the practice of health policy regarding obesity, malnutrition, and especially type 2 diabetes mellitus.
