**Advances in Network Complexity** Matthias Dehmer, Abbe Mowshowitz, Frank Emmert-Streib, 2013-06-21 A well balanced overview of mathematical approaches to complex systems ranging from applications in chemistry and ecology to basic research questions on network complexity Matthias Dehmer Abbe Mowshowitz and Frank Emmert Streib well known pioneers in the field have edited this volume with a view to balancing classical and modern approaches to ensure broad coverage of contemporary research problems The book is a valuable addition to the literature and a must have for anyone dealing with network compleaity and complexity issues

Brain Networks in Aging: Reorganization and Modulation by Interventions Junfeng Sun, Chunbo Li, 2018-02-22 Old adults undertake multiple reduced cognitive abilities in aging which are accompanied with specific brain reorganization in forms of regional brain activity and brain tissues inter region connectivity and topology of whole brain networks in both function and structure The plasticity changes of brain activities in old adults are explained by the mechanisms of compensation and dedifferentiation For example older adults have been observed to have greater usually bilateral prefrontal activities during memory tasks compared to the typical unilateral prefrontal activities in younger adults which was explained as a compensation for the reduced brain activities in visual processing

cortices Dedifferentiation is another mechanism to explain that old adults are with much less selective and less distinct activity in task relevant brain regions compared with younger adults A larger number of studies have examined the plasticity changes of brain from the perspective of regional brain activities However studies on only regional brain activities cannot fully elucidate the neural mechanisms of reduced cognitive abilities in aging as multiple regions are integrated together to achieve advanced cognitive function in human brain In recent years brain connectivity network which targets how brain regions are integrated have drawn increasing attention in neuroscience with the development of neuroimaging techniques and graph theoretical analysis Connectivity quantifies functional association or neural fibers between two regions that may be spatially far separated and graph theoretical analysis of brain network examines the complex interactions among multiple regions from the perspective of topology Studies showed that compared to younger adults older adults had altered strength of task relevant functional connectivity between specific brain regions in cognitive tasks and the alternation of connectivity are correlated to behavior performance For example older adults had weaker functional connectivity between the premotor cortex and a region in the left dorsolateral prefrontal cortex in a working memory task Interventions like cognitive training and neuro modulation e g transcranial magnetic stimulation have been shown to be promising in regaining or retaining the decreasing cognitive abilities in aging However only few neuroimaging studies have examined the influence of interventions to old adult s brain activity connectivity and cognitive performance This Research Topic calls for contributions on brain network of subjects in normal aging or with age related diseases like mild cognitive impairment and Alzheimer s disease The studies are expected to be based on neuroimaging techniques including but not limited to functional magnetic resonance imaging Electroencephalography and diffusion tensor imaging and contributions on the influence of interventions to brain networks in aging are highly encouraged All these studies would enrich our understanding of neural mechanisms underlying aging and offer new insights for developing possible interventions to retain cognitive abilities in aging subjects Supreme Emperor Deng XiaWuYu,2019-11-29 A young man named Qin Feng who was the ninth son of Dragon Emperor in the previous life was attacked by his brother in a war and his army was overwhelmed Not only that even his family was killed by his brother and his beloved woman was taken away Unwilling to die like this he practiced for a full 10 000 years and finally practiced his martial arts In this life he must return to the peak and revenge ten times About the Author Dengxia Wuyu is a well known online novelist He has rich creative experience strong writing ability and has authored many novels Among his representative works are Sword Master Close to the Sky Supreme Emperor His novels are loved for deeply describing the characters **Cross-Cultural Design.
