## **Social Assistance Dynamics In Europe:**

Social assistance dynamics in Europe Saraceno, Chiara, 2002-01-30 Throughout Europe income support for the poor has become highly controversial. It is often assumed to be not the answer to but the cause of social exclusion and is increasingly believed to give rise to welfare dependency. This book contributes to a more complex understanding of welfare state regimes and welfare recipients in contemporary Europe. Describing social assistance careers in different national and urban contexts, it documents the strong interplay between personal biographies and policy patterns, a particularly useful perspective which complements the more structural top-down approach of much international work in social policy. *Social assistance dynamics in Europe* is unique in comparing a range of northern and southern European countries: Sweden, Germany, France, Italy, Spain, and Portugal. In its focus on the actual working of their policies, their set of actors, cultural background, implementation, etc., and in its methodological approach which combines longitudinal analysis with qualitative research, *Social assistance dynamics in Europe* is invaluable. Academics and students of welfare and poverty, policy makers and social policy evaluators in the public, private, and non-profit sectors will find this book invaluable.

The Responsiveness of Social Policies in Europe Fenger, Menno, van der Steen, Martijn, 2013-09-18 Modern welfare states are confronted with a wide variety of social and economic developments including individualization, secularization, globalization, and changing preferences and ideologies of citizens. Using in-depth analysis gathered over 15 years, this book closely analyzes the consequences of these significant changes for social policies, offering theoretical and practical insights about their responsiveness. It includes a comparative analysis of recent developments in social assistance, sheltered work, and labour market policies in the Netherlands, showing how policy makers are continually trying to incorporate societal transformations into social policies while being obstructed by the path-dependent development of welfare state institutions. The insights from the case studies are related to developments in other European countries in the areas of social assistance, sheltered work, and labour market policies, and show how policy makers
