The Myth of Civil Society O. Encarnación, 2015-12-25 Almost irrespective of the geographic setting the debate about the future of democracy in post authoritarian societies is increasingly tied to the strength of civil society A strong civil society is thought to be crucial to the emergence of successful democracies while a weak civil society is deemed the cause of flawed or frozen democracies Using contrasting evidence from Spain and Brazil this study challenges these widespread assumptions about contemporary democratization It argues that it is the performance of political institutions rather than the configuration of civil society that determines the consolidation of democratic regimes

Trust and Transitions Joseph D. Lewandowski, Milan Znoj, 2009-01-23 Employing a range of empirical and theoretical approaches contributors to this volume examine the nature and function of trust from within the framework of social capital theory The empirically oriented chapters focus on post Communist countries including Serbia and Montenegro Romania and especially the Czech Republic Indeed the collection contains an entire section devoted to analyzing trust and transition in the wake of the velvet revolution The theoretical chapters engage the work of Tocqueville Putnam and Uslaner among others as they seek to clarify and rethink what in fact trust is where trust originates the causal relevance of trust for successful marketization and democratization and the extent to which existing conceptions of social capital can be adequately deployed in diverse contexts With contributions from noted American and Central European political scientists sociologists and philosophers this book presents an illuminating set of contemporary perspectives on the complex role of trust in times of transition

Uslaner,2005 Transition countries are short on both trust in people and trust in government Scarcity and corruption meant that ordinary citizens had to use informal connections to accomplish everyday tasks Ordinary people also regularly had to make extra quot giftquot payments to doctors and government officials These quot connectionsquot were potentially a source of quot anti social capitalquot Using a 2003 survey of Romanians I find that using connections and making gift payments do not lead to less trust in others or less satisfaction with the market or democracy or to perceptions of increasing inequality Grand corruption not petty corruption is the source of low trust and faith in the market and democracy
