Southeast Asia Donald G McCloud, 2018-02-07 Bridging the perceived gap between Southeast Asia s historical and contemporary situations Donald McCloud focuses on continuities in the region s internal dynamics as well as its relationship to the greater global environment The author challenges widely held views that diversity and fragmentation are the hallmarks of the region identifying instead the commonalities that have bound the countries of Southeast Asia together through at least two millennia and have provided the basis for a unique regional dynamic It has only been since World War II that Southeast Asians long influenced by the global environment have defined and developed their own institutions social structures and communities Turning away from inadequate and unadaptable Western institutions they have begun to create structures more in tune with their own historical experiences Particularly in the political sphere many of these new structures seemed to be straightforward military dictatorships However time has shown them to be more complex and many unique organizational practices have developed that may presage more open political systems if not democracies by strict Western definitions With the expansion of regional cooperation through ASEAN and strong economic growth confidence among Southeast Asian states
