Magnetodynamic Phenomena in the Solar Atmosphere Yutaka Uchida,Takeo Kosugi,Hugh S. Hudson,2013-11-11 These are the Proceedings of Colloquium No 153 of the International Astro nomical Union held at Makuhari near Tokyo on May 22 26 1995 and hosted by the National Astronomical Observatory This meeting was intended to be an interdisciplinary meeting

between researchers of solar and stellar activity in order for them to exchange the newest information in each field. While each of these areas has seen remarkable advances in recent years and while the researchers in each field have felt that information from the other's domain would be extremely useful in their own work, there have not been very many opportunities for intensive exchanges of information between these closely related fields. We therefore expected much from this meeting in providing stellar researchers with new results of research on the counterparts of their targets of research spatially and temporarily resolved as observed on the Sun. Likewise, we hoped to provide solar researchers with new results on gigantic versions of their targets of research under the very different physical circumstances on other active stars. It was our greatest pleasure that we had wide attendance of experts and active researchers of both research fields from all over the world. This led to extremely interesting talks and very lively discussions, thereby stimulating the exchange of ideas across the fields.
